EXECUTIVE SUMMARY

The Government of the Philippines, with the technical and financial support of the World Bank, has prepared a Flood Management Master Plan for Metro Manila and surrounding areas. The plan, approved by the National Economic and Development Authority (NEDA) Board on September 4, 2012, proposes a set of priority structural and non-structural measures to provide sustainable flood management up to a certain safety level. The main elements of the Master Plan are: (a) Structural measures to reduce flooding from river systems that run through the city; (b) Structural measures to eliminate long-term flooding in the floodplain of Laguna de Bay; (c) Structural measures to improve urban drainage; (d) Non-structural measures such as flood forecasting and early warning systems, and community-based flood risk management; and (e) Improved institutional structure to deal with flood management in an integrated manner.

The Metro Manila Flood Management Project, Phase 1 (MMFMP1) is part of the interventions in the Master Plan. With the Department of Public Works and Highways as the implementing agency, the Project has four components namely: (i) Modernization of Drainage Areas and Pumping Stations to be undertaken by the Department of Public Works and Highways (DPWH); (ii) Minimizing Solid Waste in Waterways to be undertaken by the Metropolitan Manila Development Authority (MMDA); (iii) Participatory Housing and Resettlement to be undertaken by DPWH, Key Shelter Agencies (KSAs), MMDA, and concerned Local Government Units (LGUs) and agencies; and (iv) Project Management, Support, and Coordination to be undertaken by DPWH and MMDA.

The rehabilitation and modernization of these pumping stations will replace pumps and related equipment with new, more efficient, and higher capacity units. The Project will also finance cleaning and improvements to key sections of waterways and drainage channels serving the pumping stations to ensure unobstructed flow into the facility and enable unencumbered access for waterway maintenance. Component 1 of the MMFMP identified 56 drainage areas and pumping stations. Of these, there are 36 existing pumping stations to be rehabilitated and 20 new pumping stations to be constructed by batch. Each subproject is defined by its Technical Footprint (TF). This covers the pumping station, waterway maintenance access points, and the optimum pumping area (OPA). The physical limits of the TF are established based on hydrological and engineering criteria for each drainage area. People who are occupying and lived are at the time of census of the technical footprint are eligible for project assistance.

Subprojects are being implemented per batch. This Resettlement Action Plan (RAP) covers the six pumping stations for Batch 3 that have project affected families (PAFs). Batch 3 is composed of ten (10) pumping stations located in Malabon City and in Navotas City. Of the 10 PS, nine (9) are within Malabon City. It must also be noted that Artex is part of Batch 3, for which a separate aRAP has been prepared and approved due to emergency reasons. While Artex remains a part of Batch 3 PS, the 4 PAFs for the Artex PS have been already relocated and counted as part of the number of affected people under in this RAP.

There are five out the 10 PS have Project Affected Families (PAFs) within the technical footprints of the PS that needs to be relocated. These pumping stations are within the congested area of the Malabon City. The environs are characterized by generally densely occupied low-rise structures with informal settlements within the creek and public rights-of-way obstructing the waterways. These obstructions include the structures built by the Informal Settler Families (ISFs) on the accumulated silts and debris along the inner wall of the waterways. It also covers those structures which would impact the proper operation and

maintenance of the pumping station and the associated waterways. In addition to the 6 PS, this RAP also includes PAFs from the proposed relocation site (also in Malabon) that will be developed in the future by NHA in exchange for the project PAFs' occupancy in the existing relocation site in Barangay Panghulo.

This RAP has been prepared in accordance with the Project's Resettlement Policy Framework (RPF) which, in turn, has been developed at project preparation in compliance with World Bank's OP 4.12 and takes into consideration laws and practices of the Philippines in relocating informal settler families in urban settings. Those who live or have structures within the TF People have been identified through census tagging, survey of socio-economic condition in July 2021, and this date has been announced publicly as the cut-off date to all Project-Affected Families/Persons (PAFs/PAPs) based on the RPF.

Project Impact. Rehabilitation of these pumping stations will necessitate the relocation of a total of 106 PAFs (384 people) and 12 businesses to be relocated. All 106 PAFs are within the TF of the pumping stations and drainage areas. This RAP will address the impacts by providing relocation assistance to 106 PAFs and to ensure that their resettlement is carried out in accordance with the RPF for the MMFMP1.

Relocation Process and Approaches. The RAP for Batch 3 has one relocation approach that was agreed by DPWH and the National Housing Authority as the KSA for the relocation of PAFs. The 106 PAFs will be relocated to the relocation site in Brgy. Panghulo, Malabon City, which was developed by NHA and one of the socialized and low-cost housing projects intended for other affected families of other government infrastructure projects and those living along the waterways.

The relocation of PAFs will observe health and safety protocols issued by the national government. Assistance will be given to the PAFs in the form of provision of personal protective equipment (PPEs), health and safety kits, and food packs that will sustain relocated families during the quarantine period.

Project Entitlements. The Project will assist PAFs in the relocation by providing relocation for 106 families at the resettlement site designated by the partner KSA, which is the NHA. The house and lot will be amortized by the PAFs for thirty (30) years at an affordable monthly amortization. Relocation assistance include expenses for transfer, food packs, and livelihood and income-generating activities under the Community-Based Livelihood Restoration and Development Program (CLRDP).

Community-Based Livelihood Restoration and Development Program. The objective of the CLRDP is to assist PAFs and their household members to immediately regain momentum and establish their livelihoods prior to and after relocation. Categories of those affected are wage-based earners and micro-entrepreneurs that will require assistance in re-establishing their sources of income. Restoration of livelihood will have two phases with three classifications, and will be implemented. In Phase I, as for Pre-Relocation, (i) immediate support will be provided from the RAP budget, inter-agency collaboration, and with LGUs support. In Phase II, as for Post-Relocation, (ii) short- to medium-term assistance and (iii) long-term restoration interventions are to be followed for livelihood and development-related undertakings.

Consultation and Participation. Public information and engagement meetings with the PAFs were conducted by the Unified Project Management Office (UPMO). The focus on these

consultation meetings is the discussion of the project status, schedule of relocation, process of relocation in consideration with the national and local guidance on physical distancing to prevent the spread of COVID-19, and the entitlements that all PAFs will get from the Project. During the public consultations, partner agencies and the LGU were available to serve as resource persons in answering queries pertinent to the type of services they can provide for the PAFs.

Grievance and Redress Mechanism (GRM). As part of its Citizens' Charter, DPWH has a functioning feedback handling system composed of two components: (a) Feedback Handling, a system that receives, sorts, and resolves feedbacks on DPWH projects, and (b) Civil Society Organization (CSO) accreditation to serve as partners and/or observers in all stages of project development cycle. A Grievance Redress in the MMFMP1 will enhance the existing feedback handling of DPWH to ensure transparency so that project issues and concerns of the PAFs at various uptake levels are effectively and expeditiously addressed and resolved. This mechanism provides the PAFs the opportunity to clarify and voice out any complaints and grievances regarding the overall implementation and resettlement process.

Institutional Arrangement. The overall responsibility for the implementation of the Project is under the UPMO of the DPWH. Their responsibilities will be carried out with the assistance from the Department of Human Settlements and Urban Development (DHSUD), NHA, and LGU Malabon. The UPMO will be assisted by the Environmental and Social Services Division (ESSD) in providing technical guidance and support in the implementation of the RAP. All activities related to the RAP preparation and implementation will be periodically reported by DPWH to the World Bank, and the RAP will be concurred by the World Bank prior to its full implementation.

RAP Budget. Funds for the implementation of RAP will be provided by the DPWH. Total funds required to implement the RAP is **One Hundred Thirty-Nine Million Twenty Thousand Five Hundred Nineteen and 70/100 Pesos only (Php 139,020,519.70),** including 10% Project Administration Cost and 15% Contingency. This also includes the construction and development of housing units, project administration cost, and contingency.

Monitoring Mechanism. The main objective of the monitoring is to verify whether resettlement was effectively implemented as planned, resettlement assistance were provided in a timely manner, and livelihoods and standards of living are improved or at least restored. The ESSD shall conduct the supervision and in-house monitoring of implementation of the RAP.

I. PROJECT DESCRIPTION

1.1. Background

Metro Manila is a highly urbanized area located in a low-lying delta, with Manila Bay at the west, Laguna de Bay at the southeast, and a system of mountain ranges at the north and northeast that drain flash floods into the Pasig-Marikina River System during typhoon events. Many areas in the Greater Metro Manila Area are low-lying and designated as flood prone, with insufficient protection against frequent inundation due to restricted natural drainage.

The Flood Control and Sewerage Management Office (FCSMO) of MMDA has, as its mandate, the formulation and implementation of policies, standards, programs, and projects for integrated metro-wide flood control, drainage, and sewerage services in Metro Manila. Presently, MMDA operates 57 pumping stations throughout Metro Manila, comprising of 23 major stations to discharge drainage water from populated areas into waterways and rivers, servicing around 8,000 ha (about 12.5% of the total area of Metro Manila) and a population of over 2.2 million people, 17 pumping stations which service major traffic underpasses and other public infrastructures, and 17 relief pumping stations in flood prone areas such as Navotas and Malabon. Many of the pumping stations and appurtenant infrastructure were constructed several decades ago, containing old and inefficient pumps.

The DPWH is mandated to undertake the planning of infrastructures, such as national roads and bridges, flood control, water resources projects, and other public works, and the design, construction, and maintenance of national roads and bridges, and major flood control systems. Historically, DPWH has been responsible for the design and construction of large pumping stations in Metro Manila.

On July 9, 2002, a Memorandum of Agreement (MOA) was entered into by DPWH and MMDA to turn over to MMDA all functions and responsibilities for flood control in Metro Manila, including all relevant programs, projects, and activities as well as personnel, funds, equipment, facilities, records, assets, and liabilities. However, due to the limited resources of MMDA, DPWH continues to design and construct pumping stations within Metro Manila. In addition, some LGUs also construct some small pumping stations.

1.2. Coverage

Under Component 1 of the MMMFM Project, the rehabilitation and modernization of these pumping stations will replace pumps and related equipment with new, more efficient, and higher capacity units. The Subproject will also finance cleaning and improvements to key sections of waterways and drainage channels serving the pumping stations to ensure unobstructed flow into the facility and enable unencumbered access for waterway maintenance. There were 56 drainage areas and pumping stations identified. Of these, there are 36 existing pumping stations to be rehabilitated and 20 new pumping stations to be constructed by batch. Each subproject is defined by its Technical Footprint (TF). This covers the pumping station, waterway maintenance access points, and the optimum pumping area (OPA). The physical limits of the TF are established based on hydrological and engineering criteria for each drainage area.

As per the RPF, people who are occupying and lived are at the time of census of the technical footprint are eligible for project assistance. Under Batch 3, there are ten (10)pumping stations located in Malabon City and in Navotas City. Of the 10 PS, nine (9) are within Malabon City. There are five out the 10 PS have PAFs within the technical footprints of the PS that needs to be relocated. These pumping stations are within the congested area of the Malabon City. The environs are characterized by generally densely occupied low-rise structures with informal settlements within the creek and public rights-of-way obstructing the waterways. These obstructions include the structures built by the ISFs on the accumulated silts and debris along the inner wall of the waterways. It also covers those structures which would impact the proper operation and maintenance of the pumping station and the associated waterways.

Those who live or have structures within the TF have been identified through census tagging, socio-economic profiling in July 2021. This date also corresponds to the cut-off date for eligibility and announced to all Project-Affected Families/Persons (PAFs/PAPs) in accordance with the Project's Resettlement Policy Framework.

This RAP covers five (5) pumping stations with informal settlers within the TF of the PS and 1 site with PAFs occupying portion of the land identified as the location of an in-city relocation to be developed for the Batch 3 PS PAFs. Table below presents the PS name and their location:

Project Area -Pumping Station	**Name of Barangay**
Acacia	Tinajeros
Balot	Hulong Duhat
Herrera	Ibaba
Merville-Dampalit	Dampalit
Niugan	Niugan
Proposed Relocation Site for Development	Maysilo

It must be noted that Artex has PAFs for which a separate ARAP was prepared due to emergency reasons. While Artex remains a part of Batch 3, it is no longer counted here as a PS with PAFs.

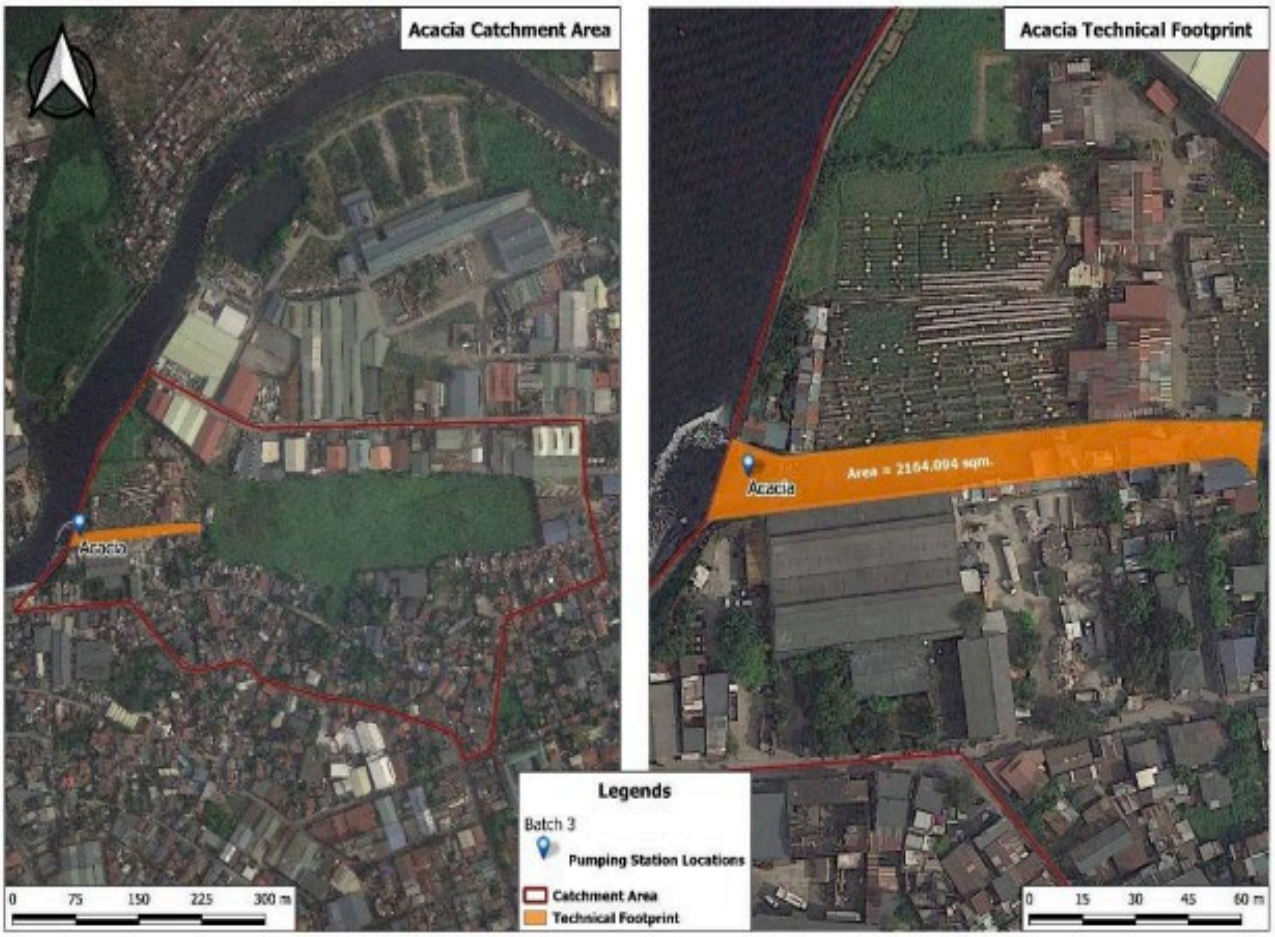

1.3. Project Location

The PS for Batch 3 are distributed into ten 9 locations within Malabon City and 1 in Navotas City: Acacia, Artex, Balot, Concepcion, Herrera, Hulong Duhat, Merville-Dampalit, and Niugan in Malabon City, and Tanza Pumping Station in Navotas City. Malabon City is located in the Northern section of Metro Manila as shown in the Metro Manila map below:

The locations of the Batch 3 Pumping Stations are presented in Figures 1-9.

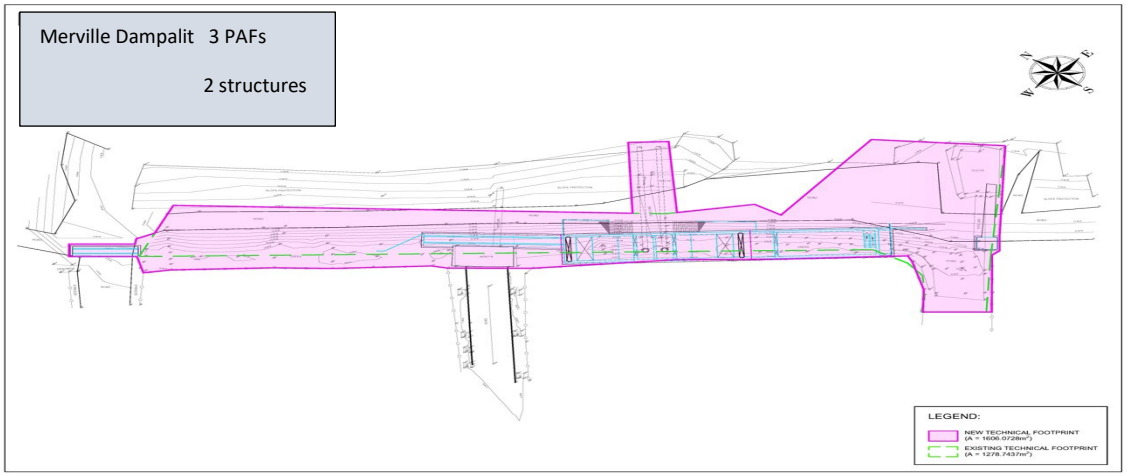

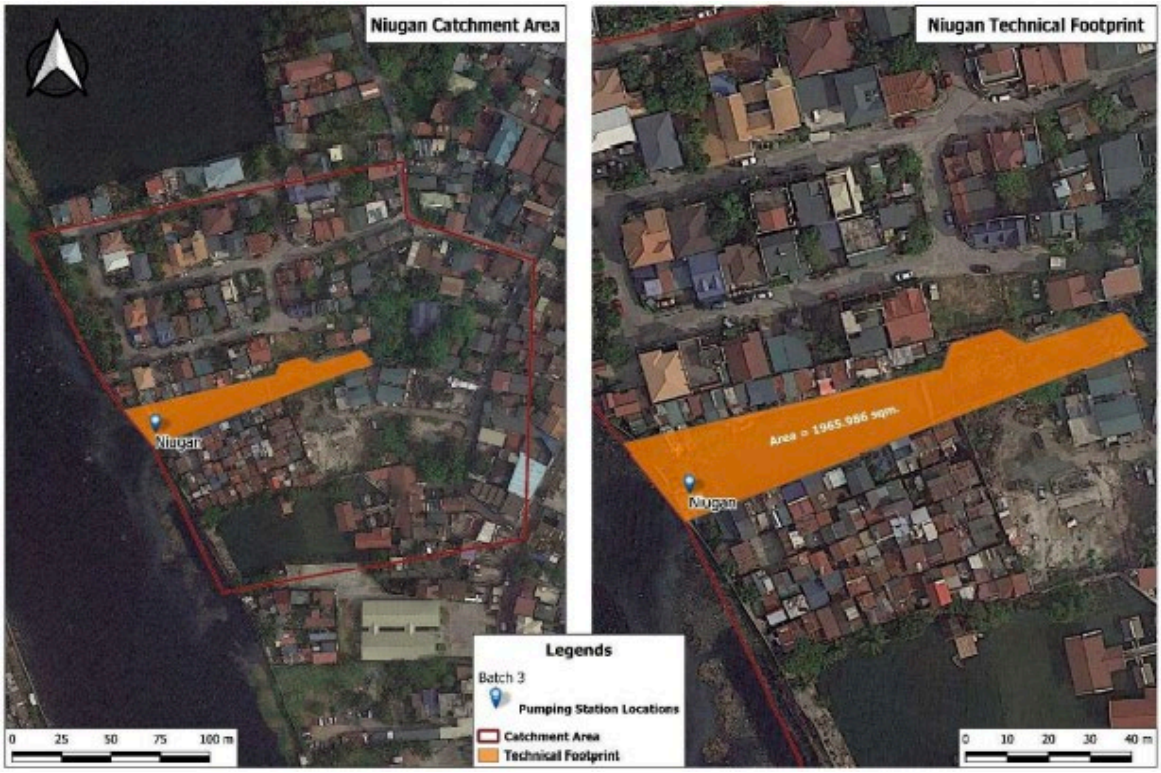

Figure 8. Niugan Pumping Station

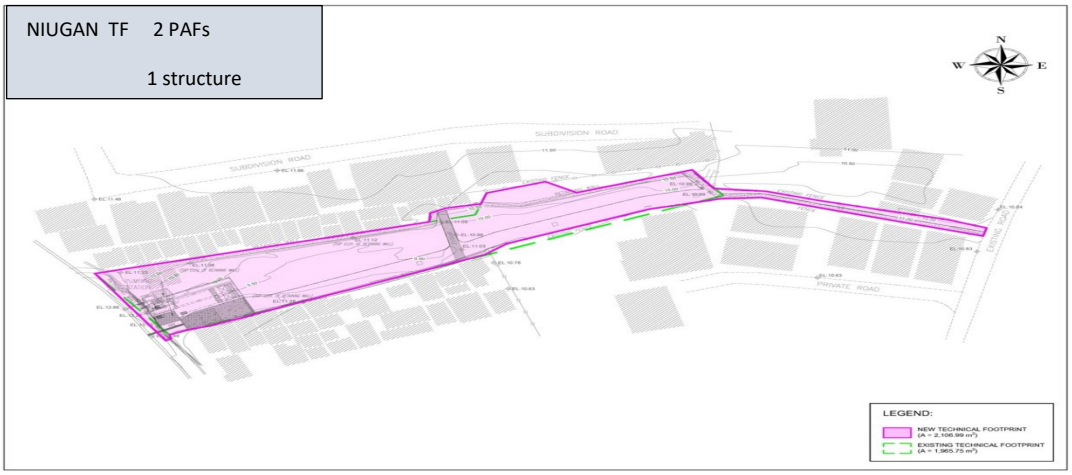

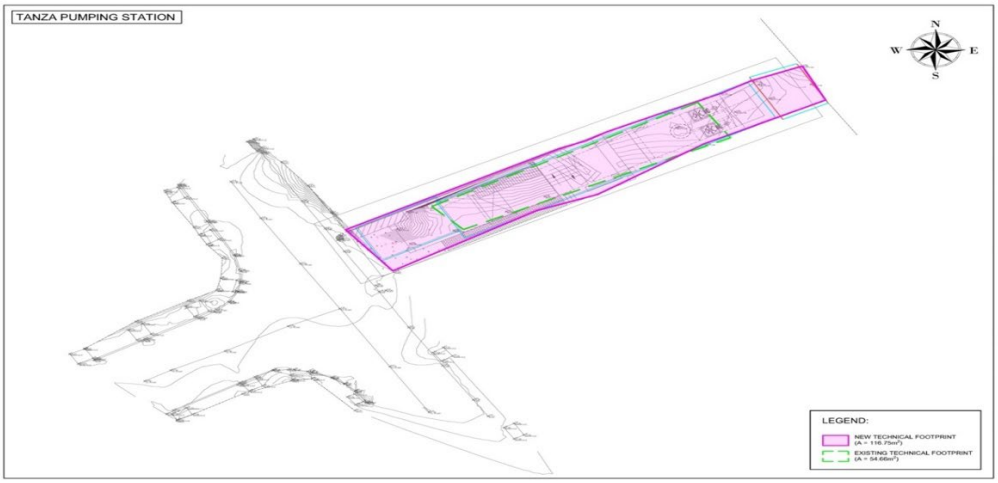

Figure 9. Tanza Pumping Station[1]

1.4. Project Objective

The objective of the study is to improve flood management in selected areas of Metro Manila. This is envisioned to be achieved through various means including: (i) constructing new and modernizing existing pumping stations, and improving their supporting infrastructure and associated drainage systems, (ii) improving solid waste management practices within the vicinity of drainage systems served by the selected pumping stations, and (iii) supporting the resettlement of PAPs, mostly PAFs.

[1] Tanza Pumping Station is located at Navotas City, but it is part of the Batch 3 Pumping Stations. There are no PAFs for this pumping station.

1.5. Project Components

The modernization of pumping stations will include an integrated set of interventions to modernize existing pumping stations up to a certain degree of its design capacity, among others, and construction of additional pumping stations to accommodate urban expansion, improve associated waterways and drainage systems, and, where feasible, increase short-term water retention capacity in the drainage areas.

The scope for Component 1 is divided into three sub-components to be conducted in parallel and in an iterative and interactive manner, namely:

a. Upgrading/Modernization of Existing Pumping Stations;
b. Construction of New Pumping Stations; and
c. Clean-up of Related Waterways and Drainage Systems.

1.5.1. Upgrading/Modernization of Existing Pumping Stations

As part of the modernization program, pumps will be replaced with modern, more efficient, and higher capacity units. The design discharge of higher capacity units will be underpinned by hydrological studies of the drainage areas. Possible improvement to appurtenant infrastructure may be included, such as floodgates, trash racks, change in needed energy source from diesel to electricity, etc.

1.5.2. Construction of New Pumping Stations

The construction of new pumping stations will be in the flood-prone areas around Metro Manila where the population has grown rapidly over the past 10-20 years. Each proposed site shall be investigated and studied comprehensively to determine whether a particular proposal is feasible and a priority for implementation.

1.5.3. Clean-up of Related Waterways and Drainage Systems

The cleaning and dredging of related waterways and drainage channels around the existing/proposed pumping stations will be conducted for smooth water inflow/outflow. There may be some limited expansion of the drainage system in a few drainage areas, which will also be designed and supervised as part of this component. This component also includes the procurement of additional specialized equipment for maintenance of waterways and drainage channel maintenance.

II. SOCIO-ECONOMIC PROFILE

This chapter briefly describes the Socio-Economic Profile of the PAPs, who are structure owners, renters, and sharers. Below summarizes the number of PAFs per PS including the future relocation site in Maysilo. These PAFs are directly affected by the project as they are living within the waterways/technical footprints of the project. Table below presents the total number of PAFs of PS Batch 3. Of the 106, an aRAP for Artex PS with 4 PAFs is still included in the count.

Pumping Station	Barangay	Directly Affected Families
Herrera	Ibaba	19
Artex	Panghulo	4
Acasia	Tinajeros	28
Merville-Dampalit	Dampalit	3
Niugan	Niugan	2
Balot	Hulong Duhat	3
Maysilo	Maysilo	47
Total		**106**

As previously mentioned, a separate aRAP has been prepared for Artex and relocated 4 PAFs due to emergency situation affected by the extreme floodings in their area that compromised the safety of families living in their housing structures. The socio-economic information of the Artex PAFs is still part of the discussion in this RAP. All PAFs were informed about the social surveys conducted by the project. In addition, the PAFs were likewise consulted about their relocation to a site in Panghulo Malabon City as discussed in Chapter 11 of this RAP.

2.1. Objectives

The Socio-Economic Survey (SES) will be the basis for (i) establishing compensation parameters, and (ii) designing livelihood and income restoration programs for the PAPs. It is also the means for monitoring the resettlement plan's effectiveness in mitigating impacts of resettlement.

2.2. Method

Data was gathered through a survey of the affected households using a structured questionnaire. Data was disaggregated by sex to determine the differences between males and females in terms of several aspects, e.g., access to education.

2.3. Scope and Limitations

Scope – This report describes the demographic structure of the communities, affected households' livelihood systems, income and expenses, access to social services, and perceptions on the Project, among others.

Limitations – The enumerators' main reference in locating the respondents was the information gathered in the field survey using the plotted TFs.

The interview duration was quite lengthy for some respondents, especially those in the 50-and-above age group, while some respondents did not willingly divulge their income, so some income data included in this report were based on estimates.

2.4. Cut-off Date

The defined Technical Footprint (TF) covers the pumping station, waterway maintenance access points, and the optimum pumping area (OPA). The physical limits of the TF are established based on hydrological and engineering criteria for each drainage area. People who are occupying and lived are at the time of census of the technical footprint are eligible for project assistance. Those who live or have structures within the TF People have been identified through census and survey of socio-economic condition in July 2021, and this date has been announced publicly as the cut-off date to all Project-Affected Families/Persons (PAFs/PAPs) based on the RPF and in compliance with the requirements of OP 4.12 and this Resettlement Action Plan (RAP). The duration of the survey for Batch 3 Pumping Stations PAFs were conducted on July 6 to 23, 2021. The last day of the census survey was July 23, 2021 and was also the established project cut-off date. The cut-off date has been announced to the PAFs in the series of consultation meeting conducted for the Batch 3 PS.

2.5. Overview of the Survey Respondents

The profile of PAPs is based on the survey conducted prior to validation. The figures herein are treated as statistical data that closely reflect or represent the socio-economic condition of the final list of PAPs prior to displacement and not the final figure of PAPs to be displaced.

The survey covered 106 households, and among those are twelve (12) business owners and 12 renters/sharers.

Table 1 shows the summary of the PAPs who may experience consequent economic displacement impact because of the Project.

Table 1. Overview of Surveyed PAPs

Barangay	Households	Persons	Business Owner	Renters
Ibaba	19	72	-	2
Panghulo	4	20	-	-
Tinajeros	28	103	-	-
Dampalit	3	9	-	5
Niugan	2	6	-	-
Hulong Duhat	3	15	-	-
Maysilo	47	159	12	5
Total	**106**	**384**	**12**	**12**

Out of 106 PAFs who were interviewed and profiled, from Barangay Dampalit, Ibaba, Niugan, Panghulo, Tinajeros, and Hulong Duhat in Malabon City, 47 PAFs will be included from Brgy. Maysilo for the relocation site development. However, there are still PAFs that are yet to be interviewed as they are either working or living with a relative far from the barangay due to COVID situation. Nonetheless, they are still included in the masterlist of beneficiaries because they were covered within the cut-off date of the Project that included the validation.

2.6. Summary and Key Findings of the Socio-Economic Validation Survey

The findings of the SES are organized into five (5) parts: (i) Household Demographic Profile, (ii) Tenurial Status, (iii) Level of Vulnerability, (iv) Occupation, Employment, and Income Sources, and (v) Household Assets, Utilities, and Sanitation.

2.6.1. Household Demographic Profile

Half (50%) of the total number of PAPs are male while 45% are female as shown in table below.

Table 2. Gender of Project-Affected Household Members

Barangay	Male	Female	No Response	Total	%
Ibaba	38	32	2	**72**	**19%**
Panghulo	12	6	2	**20**	**5%**
Tinajeros	58	41	4	**103**	**27%**
Dampalit	7	2	0	**9**	**2%**
Niugan	2	4	0	**6**	**2%**
Hulong Duhat	3	0	12	**15**	**4%**
Maysilo	72	87	0	**159**	**41%**
Total	**192**	**172**	**20**	**384**	**100%**
%	**50%**	**45%**	**5%**	**100%**	

Most (71%) of the household heads belong to working-age group – 23% are those aged 21-30 years old, 20% are those aged 31-40 years old, and 28% are those aged 41-50 years old.

Table 3. Age Distribution by Gender of Household Heads

Barangay	Gender	Age Distribution								Total
		20 years old & below	21-30 years old	31-40 years old	41-50 years old	51-59 years old	60 years old & above	Subtotal	No Response	
Dampalit	Male	0	1	0	0	2	0	**3**	**0**	**3**
	Female	0	0	0	0	0	0	**0**		
Ibaba	Male	0	6	3	5	0	1	**15**	**0**	**19**
	Female	0	0	1	2	0	1	**4**		
Niugan	Male	0	0	1	0	0	0	**1**	**0**	**2**
	Female	0	0	0	0	0	1	**1**		
Panghulo	Male	0	1	0	2	0	0	**3**	**0**	**4**
	Female	0	0	0	0	0	1	**1**		
Tinajeros	Male	0	3	6	7	2	5	**23**	**1**	**28**
	Female	0	0	0	1	3	0	**4**		
Hulong Duhat	Male	0	0	1	1	1	0	**3**	**0**	**3**
	Female	0	0	0	0	0	0	**0**		
Maysilo	Male	1	5	5	6	3	2	**22**	**0**	**47**
	Female	0	8	4	6	3	4	**25**		
Total		**1**	**24**	**21**	**30**	**14**	**15**	**105**	**1**	**106**
%		**1%**	**23%**	**20%**	**28%**	**13%**	**14%**	**99%**	**1%**	**100%**

Most (48%) of the household heads have an income of Php 10,000.00 – Php 19,999.00 a month, while 31% have income below Php 10,000.00. It shows that some households belong to the vulnerable group in terms of the criteria on their income.

Table 4. Monthly Household Income

Monthly Household Income	Barangay							Total	%
	Dampalit	Ibaba	Niugan	Panghulo	Tinajeros	Hulong Duhat	Maysilo		
Php 9,999 and below	0	5	2	1	6	2	17	**33**	**31%**
Php 10,000 - 19,999	2	8	0	1	14	1	25	**51**	**48%**
Php 20,000 - 29,999	0	4	0	0	6	0	3	**13**	**12%**
Php 30,999 - 39,000	1	0	0	1	0	0	2	**4**	**4%**
Php 40,000 - 49,999	0	0	0	0	2	0	0	**2**	**2%**
Php 50,000 and above	0	1	0	0	0	0	0	**1**	**1%**
No Response	0	1	0	1	0	0	0	**2**	**2%**
Total	**3**	**19**	**2**	**4**	**28**	**3**	**47**	**106**	**100%**

It can be deduced from these data that 63% of the PAFs are part of the vulnerable sector as they are earning less than Php 12,082 per month, which is the poverty threshold for a family of five[2].

Table 5. Vulnerability Based on Household Income

Barangay	Below Poverty Threshold		Above Poverty Threshold		No Response	Total
	Owner	Renter	Owner	Renter		
Dampalit	1	0	2	0	0	**3**

2.6.2. Tenurial Status

The table shows that PAFs resided throughout their lives along the TFs. They have been encroaching the creek a long time ago, which endangers their lives during the rainy seasons by inhaling air pollution due to the bad-smelling creek.

On the other hand, those PAFs in the relocation site to be developed are already living in the area since birth. They are living at Oreta Compound with consent from NHA.

Table 9 . Tenurial Status and Years of Stay

Barangay	Owners		Renters	
	No. of PAFs	Years of Stay	No. of PAFs	Years of Stay
Dampalit	3	15-23 yrs.	0	-
Ibaba	17	6-65 yrs.	2	7-26 yrs.
Niugan	2	32-42 yrs.	0	-
Panghulo	4	9-40 yrs.	0	-
Tinajeros	23	2-60 yrs.	5	3-57 yrs.
Hulong Duhat	3	15 yrs	0	-
Maysilo	44	2-69 yrs	3	4-40 yrs
Total	**96**		**10**	
%	*91%*		*9%*	

There are 47 PAFs (44%) living along the TFs for more than 20 years, while the remaining 59 are either living in the area for 1-5 years (16%), for 6-15 years (14%), for 16-20 years (8%), or have no response (18%). The data gathered reflects that the PAFs in the Barangays are already living in the area for so long.

Table 10. Years of Tenure

2.6.3. Level of Vulnerability

42.3% of the total number of households are categorized as households with baby/toddler. 41.1% are households below the poverty threshold. 10.4% are households with solo parents, and 6.1% are with elderly.

It is understandable that most PAFs were noted during the survey to have suffered from low income due to the stoppage of economic operations brought by the pandemic.

Table 11. Level of Vulnerability

Categories	Total	
	Person	%
Households with baby/toddler	69	42.3%
Households with solo parent	17	10.4%
Households with elderly	10	6.1%
Households with physically disabled member	0	0%
Households with members who have health issues	0	0%
Households below poverty threshold	67	41.1%
Total	**163**	**100%**

2.6.4. Occupation, Employment, and Income Sources

Based on the declared sources of income of household heads, 28% of the PAFs work as office workers/company employee in a private sector, 25% are unskilled/semi-skilled or laborers, 14% are skilled workers, 10% are vendors and shopkeeper/owners, 6% are government employees, and 5% are those with other types of work. It also shows that

12% of the household heads are unemployed, which is prevalent among household heads who are senior citizens and were prohibited to work since they are most vulnerable to COVID-19 virus.

Other members of the families contributing income are unskilled/semi-skilled workers working at the construction or factories (35%), followed by vendors/street hawker (29%), skilled workers (24%), vendors and shopkeeper/owners (35%), and government employees (6%).

Table 12. Source of Income

Primary Source of Income		
Unskilled/Semi-skilled	26	25%
Skilled Worker	15	14%
Government Employee	6	6%

Remittances and Other Source of Income		
Government Subsidy/Pension	14	74%
Remittances from Relatives	1	5%
Business	4	21%
Gambling	0	0
Rental	0	0
Total	**19**	**100%**

In terms of remittances and other sources of income, 74% of PAFs are receiving government subsidies such as Pantawid Pamilyang Pilipino Program (4Ps) and Senior Citizen assistance or pensions, 21% have business income from engaging in sari-sari stores or online selling, and 5% receive remittance from relatives working outside the country as Overseas Filipino Workers (OFWs).

During the SES, there were no businesses that are expected to be affected by the Project. However, during the validation, it was found out that there are 12 PAFs who informed that they are doing their business online and/or own a local eatery and a car wash business.

Table 13. Kinds of Business

Kinds of Business	Total	%
Online Selling	9	75%
Local Eatery	2	17%
Car Wash	1	8%
Total	**12**	**100%**

Out of 93 PAFs who declared their source of income from employment, 8.6% are employed as commuter drivers, while 6.5% are vendors and 6.5% are supermarket merchandisers. Moreover, 17% of PAFs are employed in the construction industry – 6.5% are construction workers, 6.5% are helpers/laborers/utility workers, 1.1% work as electrician, 1.1% as heavy equipment operator, 1.1% as painter, 1.1% as a mechanic, and 1.1% as welder. There are also PAFs resilient to the pandemic as they work continuously either as online sellers (6.5%), fastfood service crew (3.2%), delivery riders (4.3%), or in IT/BPO industry (3.2%).

There are also PAFs who are frontliners during this pandemic, which include health workers (1.1%), bank employees/tellers (1.1%), and government employees (5.4%).

Table 14. Kinds of Employment

Kinds of Employment	Total	%
Factory Worker	5	5.4%

%	*23%*	*17%*	*3%*	*22%*	*2%*	*33%*	*100%*

2.6.5. Household Assets, Utilities, and Sanitation and Housing Materials

These PAFs, living along the creek for a long time, already established their simple standard of living and owned assets for comfort and entertainment. For house chores, 83% of them have a gas stove used for cooking; 64% have a washing machine for laundry; 47% have a refrigerator to store their food supplies and refreshments; and 30% have a dining set to enjoy their food and refreshments.

For their comfort and entertainment, 78% of them have a TV set; 43% have a radio; and 27% have a living room set where they can rest while watching their favorite movies/series or listening to their favorite songs.

There are also PAFs who invest in assets for transportation services or for private use. 11% of them own tricycles, and 4% own cars/jeepneys and use those as their source of income.

Moreover, due to the fact that all have access to the Internet nowadays, online applications require gadgets, like smartphones, tablets, and computers, so 85% of them own telephone/mobile phones, and 11% have computers. Investing in these gadgets is a necessity, especially those household members who are students (for their online classes) and/or online sellers.

Table 16. Household Assets

Item	Number of Households with Assets	Percentage (%)
Radio	46	43%
Television (TV)	83	78%
Refrigerator	50	47%
Living Room Set	29	27%
Dining Set	32	30%
Car/Jeepney	4	4%
Tricycle	12	11%
Washing Machine	68	64%
Gas Stove	88	83%
Telephone/ Mobile Phone	90	85%
Computer	12	11%

Majority (87%) of the PAFs has water connection from Manila Water/Maynilad, while 9% are buying from resellers, and 3% have submeter from those that have water connection from Manila Water/Maynilad.

Table 17. Household Water Source

Water Source	Total	%
Buying from resellers/private sources	10	9%
Water utilities (Manila Water/Maynilad)	92	87%
Submeter	3	3%
Other Sources	1	1%
Total	**106**	**100%**

It is recorded that 15% of the PAFs honestly declared that their source of electricity is through illegal electrical connection from their neighbor; however, it was not clarified if they have consent from the owner of the electric meters. 8% of PAFs have a submeter, but it was also not clarified if these submeters are from the owners or those that have illegal electrical connection. 8% and 3% of the PAFs use a generator set from private and developer, respectively. Majority (61%) of the PAFs declared that their source of electricity is through connection to power utility/grid.

Table 18. Household Electrical Source

Electrical Source	Total	%
Generator Set from Developer	3	3%
Private Generator Set	9	8%
Illegal Connection	16	15%
Power Utility/Grid	65	61%
Submeter	8	8%
None	5	5%
Total	**106**	**100%**

The table below shows that PAFs dispose their household wastes directly to the drainage – 7% to canals, 10% to esteros, and 29% to rivers – resulting to water pollution and obstruction of waterways. On the other hand, 53% of them have septic tanks.

Table 19. Household Sanitation

Sanitation	Total	%
Drainage Canal	8	8%
Estero	11	10%
River	31	29%
Septic Tank	56	53%
Total	**106**	**100%**

The PAFs homes build on the waterways, and the garbage thrown into the water, have been identified as among the main factors impending the flow of floodwater into the sea. Most or 95% of housing units in these sites are mostly made of salvage and light materials with few units 5% are made of semi -concrete materials for housing on stilts. There 64 residential structures owned by the 106 PAFs. As shown in the figures below, there most of the structures are made of mixed salvage to light materials, mixed of light and concrete materials and concrete materials Average sizes of housing units in the Barangays covered under this Batch is between 12 to 20 square meters.

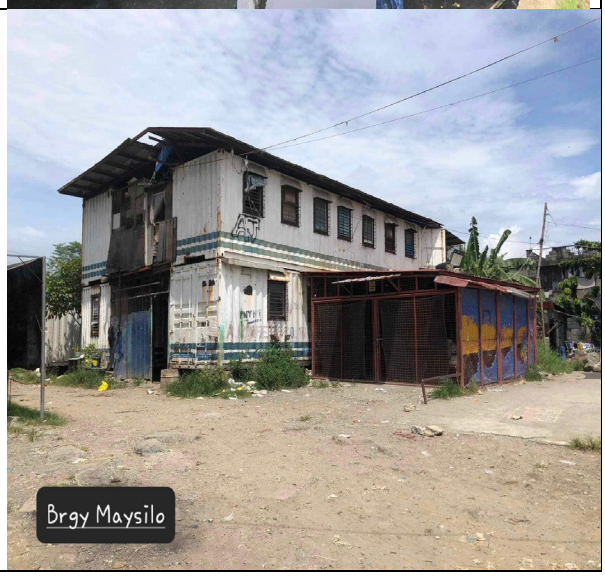

Table 20. Housing Unit Size and Average Cost

Pumping Station	Barangay	No. of ISFs	No. of Structures	Average Area Affected per Sq.m.	Make

III. PROJECT IMPACTS

The most adverse impacts of the Project on people and families are the loss of their housing assets due to physical displacement or relocation, reduction or loss of income sources (especially those engaged in micro-businesses, such as sari-sari stores and local eatery), and the anxiety due to being separated from their families and friends in their current barangay. Adequate and timely information on the relocation process will help avoid involuntary resettlement and can mitigate the adverse impacts to relocated individuals and families. This may be done through proper resettlement planning and implementation, involving the affected households through public consultations, and providing assistance for displaced persons and communities to improve or restore their standard of living.

In reducing the temporary impacts on shelter provision, the contractor and the DPWH will ensure that PAFs will be informed and involve the people on the project activities and timeline, and ensure minimal disruption to the community, as part of the physical and social safeguards policies.

Based on the result of the Focus Group Discussions (FGDs) and SES, the positive and negative impacts are the following:

3.1. Positive Impacts

During the FGD, PAFs and Barangay representatives mentioned that, after the project, their community will be free from floods, safer during typhoon or rainy season, and healthier as their community no longer have stagnant water that acts as breeding ground for mosquitoes that can transmit diseases like dengue or malaria, and for rats that can increase the likelihood of people contracting leptospirosis from their wastes. Avoiding diseases or infections would result in communities having better economic opportunities.

3.2. Negative Impacts

The negative impacts of relocation that the PAFs mentioned include the reduction or loss of their income, particularly those engaged in micro-businesses like sari-sari stores and local eatery or those who rented their temporary shelters, and the change of lifestyle. There are also concerns related to the quality of the housing unit, such as the space is too small especially for families with more than three (3) members.

3.3. Problems Foreseen During Construction and Operation

There are also foreseen environmental risks and hazards as stated by the respondents during the construction. Operation of heavy equipment will cause air and noise pollution, create heavy traffic, and could be hazardous especially to children. Students, women/mothers, and workers are concerned about the noise, as it can disturb them during online classes or meetings, and while working from home.

Table 21. Summary and Details of Impacts on PAPs

Table below presents the 106 PAFs with 18 of them are with vulnerabilities. Of the 106 families (384 people) 60 of them are owners of housing structures. Twelve PAFs with business will be affected and 93 affected employees.

Impact	Extent/Number
Project-Affected Households	106 PAFs/384 people
Structure-Affected Households	60 PAFs
Economically Displaced Households (business)	12 PAFs
Affected Employees	93
Vulnerable Project-Affected Households	18 PAFs

Affected PAFs	Physical Displacements	Economic Displacements, Social Services and Network
106 house owners, sharers, and renters	• Residential houses with an average size between 16 to 20 square meters per structural survey. House is mostly made of light and salvaged materials, with common walls and light to strong roofing.	• There is less potential loss of income for unskilled and semi-skilled workers as the relocation site is in the nearby barangay.
93 wage earners	• There are no impact as the relocation area is in the nearby barangay. • Transportation to their workplace is almost the same.	• Less or no potential impact.
12 business owners	• Displacement could impact those with micro-businesses, like sari-sari stores and local eatery.	• Potential impact for the sari-sari store and local eatery owners, but no impact to those who are engaged in online selling.

3.4. Severance – Social Networking Disruption

There are families that will be disrupted on their social networking due to the displacement. However, the Project ensures that severance concerns among the families shall be mitigated. Ways to address them include: (1) providing project assistance to affected families sharing common wall in their housing units because once houses are demolished, the remaining portion of the housing unit is no longer viable and safe to occupy, (2) Households who are dependent and or would be needing assistance in sustaining their source of income and livelihood from their relatives and friends and (3) other circumstances that will facilitate the adjustment into their new housing location .

All of 106 PAFs are directly affected is presented in the table below with corresponding number of families by Barangay. The total number PAFs in this RAP is 106. This included 4 families that resides in Artex PS that had been relocated due to emergency situation and has been counted in this RAP to present the totality of impact in the Batch 3 of the Project. The 4 PAFs had been relocated to Panghulo Resettlement Site in Malabon City upon clearance from the Bank on the prepared aRAP. Table below are the location of the PS, and the number of affected families per Barangay.

Pumping Station	**Barangay**	**Affected Families**
Herrera	Ibaba	19
Artex	Panghulo	4
Acasia	Tinajeros	28
Merville-Dampalit	Dampalit	3
Niugan	Niugan	2
Balot	Hulong Duhat	3
Maysilo	Maysilo	47
Total		**106**

IV. LEGAL FRAMEWORK AND POLICY ON RESETTLEMENT AND RELOCATION

This chapter describes all relevant local laws that apply to resettlement, identifying gaps between local laws and WB policies and measures to mitigate the gap. Batch 3 Pumping Stations will not require acquisition of private land. This RAP follows the MMFMP RPF and is compliant with the requirements of OP 4.12.

4.1. The Philippine Constitution

The 1987 Philippine Constitution serves as the basic legal foundation of resettlement policies governing the following:

Article II, Section 10 states that, "The State shall promote social justice in all phases of development."

Article II, Section 11 states that, "The State values the dignity of every person and guarantees full respect for human rights."

Article 9 of the 1987 Philippine Constitution states that the "private property shall not be taken for public use without just compensation," whilst Section 1, Article III, 1987 Philippine Constitution states that "No person shall be deprived of life, liberty or property of law, nor shall any person be denied the equal protection of the laws."

On the other hand, PAFs' rights to adequate housing and consultation are enshrined in the 1987 Philippine Constitution, Article XIII, Sections 9 and 10, which read:

"Section 9. The State shall, by law, and for the common good, undertake, in cooperation with the private sector, a continuing program of urban land reform and housing which will make available at affordable cost decent housing and basic services to underprivileged and homeless citizens in urban centers and resettlement areas. It shall also promote adequate employment opportunities to such citizens. In the implementation of such a program the State shall respect the rights of small property owners.

Section 10. Urban or rural poor dwellers shall not be evicted, nor their dwellings demolished, except in accordance with law and in a just and humane manner.

No resettlement of urban or rural dwellers shall be undertaken without adequate consultation with them and the communities where they are to be relocated."

4.2. Philippine Legislations

4.2.1. RA 10752 or Right of Way Act of 2016. An Act Facilitating the Acquisition of Right-of-Way (ROW) Site or Location for National Government Infrastructure Projects

The act spells out the necessity for determining the current market value of the affected assets such as lands, houses, and/or improvements, including the crops, trees, and perennials as a basis for computing the compensation cost for the PAFs of a government project. It also expedites the implementation of government infrastructure projects. The law provides a clear and simple ROW Acquisition Guideline which benefits both the property owners/PAPs and Implementing Agencies (IAs).

4.2.2. RA 11201 or An Act Creating the DHSUD, Defining its Mandate, Powers and Functions, and Appropriating Funds

The law took effect on February 14, 2019. The new law consolidated the HUDCC and the Housing and Land Use Regulatory Board (HLURB). The Department shall act as the primary national government entity responsible for the management of housing, human settlement, and urban development. It shall be the sole and main planning and policy-making, regulatory, program coordination, and performance monitoring entity for all housing, human settlement, and urban development concerns, primarily focusing on the access to and the affordability of basic human needs.

Section 2 of this act provides that the State shall, pursuant to Section 9, Article XIII of the Constitution, ensure that underprivileged and homeless citizens have access to an adequate, safe, secure, habitable, sustainable, resilient, and affordable home.

4.2.3. RA 7279 or Urban Development and Housing Act of 1992

It is an act to provide for a comprehensive and continuing urban development and housing program, establish the mechanism for its implementation, and for other purposes. The law also provides that LGUs, in coordination with NHA, shall implement the relocation and resettlement of persons living in danger areas such as esteros, railroad tracks, garbage dumps, riverbanks, shorelines, waterways, and in other public places such as sidewalks, roads, parks, and playgrounds.

The same rights are upheld in Section 8 (Site Selection), Section 21 (Basic Services), Section 22 (Livelihood), Section 28 (Eviction and Demolition), Section 29 (Resettlement), as enumerated below:

Section 8. Identification of Sites for Socialized Housing

After the inventory, the LGUs, in coordination with the NHA, the National Mapping Resource Information Authority (NAMRIA), and the Land Management Bureau (LMB), shall identify lands for socialized housing and resettlement areas for the immediate and future needs of the underprivileged and homeless in the urban areas, taking into consideration the degree of availability of basic services and facilities, their accessibility and proximity to job sites and other economic opportunities, for the actual number of registered beneficiaries.

Section 21. Basic Services

Socialized housing or resettlement areas shall be provided by the LGU or NHA in cooperation with the private developers and concerned agencies with the following basic services and facilities:

- Potable water;
- Power and electricity and an adequate power distribution system;
- Sewerage facilities and an efficient and adequate solid waste disposal system; and
- Access to primary roads and transportation facilities.

The provision of other basic services and facilities such as health, education, communication, security, recreation, relief, and welfare shall be planned and shall be given priority for implementation by the LGU and concerned agencies in cooperation with the private sector and the beneficiaries themselves. The LGU, in coordination with the concerned national agencies, shall ensure that these basic services are provided at the most cost-efficient rates, and shall set a mechanism to coordinate operationally the thrusts, objectives, and activities of other government agencies concerned with providing basic services to housing projects.

Section 22. Livelihood Component

To the extent feasible, socialized housing and resettlement projects shall be located near areas where employment opportunities are accessible. The government

agencies dealing with the development of livelihood programs and grant of livelihood loans shall give priority to the beneficiaries of the program.

Section 28. This act outlines the procedure for eviction and demolition for PAFs.

Section 29. Resettlement

Within two (2) years from the effectivity of this Act, the LGUs, in coordination with the NHA, shall implement the relocation and resettlement of persons living in danger areas such as esteros, railroad tracks, garbage dumps, riverbanks, shorelines, waterways, and in other public places such as sidewalks, roads, parks, and playgrounds. The LGU, in coordination with NHA, shall provide relocation or resettlement sites with adequate basic services and facilities, and access to health services and education facilities, employment, and livelihood opportunities sufficient to meet the basic needs of the affected families.

4.2.4. RA 9729 or Climate Change Act

The law prescribes the mainstreaming of climate change, in synergy with disaster risk reduction, into the national, sectoral, and local development plans and programs. LGUs have been assigned to lead the formulation, planning, and implementation of climate change action plans in their respective areas, and to consider climate change adaptation and disaster risk reduction and response as included in their regular functions.

4.2.5. RA 10121 or Disaster Risk Reduction and Management Act

The Act recognizes and strengthens the capacities of LGUs and communities in mitigating and preparing for, responding to, and recovering from the impact of disasters. These policies also apply in the formulation of housing and resettlement plans by the LGUs and require that the resettlement areas are designed to be adapting to climate change and community systems allowing for disaster risk reduction and response.

4.3. Executives Orders, Department Orders and Policies Relevant to this Project

4.3.1. DPWH Special Order (SO) No. 1, Series of 2017

In line with the issuance of Department Order (DO) No. 203 s. 2016, this Order regarding Composition of UPMO-ROW Task Force was issued. The UPMO-ROW Task Force will be supported by a Technical Working Group (TWG) to be represented by the representatives of the members of the Task Force.

Recognizing that implementation of urgent national roads, bridges, and various flood control projects are hampered by the delay in the ROW acquisition, a Task Force on UPMO-ROW and TWG are created. The Task Force will be headed by the Undersecretary for UPMO Operations, the Vice Chairman will be the Director of Legal Service, and TWG members to be composed of the ROW Task Force.

The DO also defines the functions of the UPMO Task Force and TWG such as processing and payment of valid claims, submission of documents, records-keeping, and signing authority.

The functions of the ROW Task Force are to: (i) organize a TWG for each UPMO Cluster that will handle ROW acquisition of its projects, to be headed by its Project Manager assigned to the project, (ii) monitor the ROW acquisition, (iii) execute and recommend appropriate resolutions pertaining to ROW payment, and (iv) review the validation of support undertaken by its TWG.

4.3.2. DPWH DO 119, Series of 2017

This is re-issuance of DO 203 s. 2016 and stipulates function and responsibilities of a Task Force and a TWG on ROW land acquisition. Function and responsibilities of the Task Force and TWG are not changed, but the payment method is modified. This DO stipulates that the payment of ROW claims shall be made by the Central Office.

4.3.3. DPWH DO 152, Series of 2017

This is re-issuance of DO 124 s. 2017 or Directing the Use of the DPWH ROW Acquisition Manual, to provide a clear, uniform, and user-friendly guide on the rules and procedures for the acquisition by the DPWH of ROW for its infrastructure projects, in accordance with the provisions of RA 10752 (ROW Act) and its Implementing Rules and Regulations, in order to achieve a more effective and expeditious implementation of the projects.

4.3.4. DPWH DO 65, Series of 2017

As part of the continuing effort of DPWH to streamline its operations, decentralize, and rationalize the ROW operations, DO 19 s. 2017 was re-issued, essentially delegating to regional directors the approval/signing of documents pertaining to Infrastructure Right-of-Way (IROW) for national projects, including the approval for payments of claims and signing of checks. The DO also reiterates that the ROW functions are delegated, and a system of deploying ROW Task Force, UPMO-ROW activities, and their approving authorities shall continue to be governed by DO 203 s. 2016, and SO 1 s. 2017. This Order also supersedes DO 19 s. 2017, DO 156 s. 2016, DO 133 and 133-A s. 2014, DO 24 s. 2007, DO 327 s. 2003, and all other DOs and policies, or portions thereof, contrary to or inconsistent with this Order are amended accordingly.

This also defines the scope and delegation of the ROW functions and creation and composition of ROW Task Force. ROW Task Force is also mandated to engage in inter-agency coordination and consultation, recommend to the appropriate authority, appropriate measures to address ROW problem areas which lie outside the authority of any member of the ROW Task Force. It is also tasked to advise and recommend to the Undersecretary of Planning and Public Private Partnership (PPP) the budgetary matters for purposes of submitting accurate, complete, and informed budget requests to the Department of Budget and Management (DBM), and for other budgetary planning objectives.

4.3.5. DPWH DO 130, Series of 2016

This provides the guidelines for the implementation of the provisions of RA 6685 and RA 9710 or the Magna Carta of Women. The implementing rules and regulations mandates

the contractors to hire a minimum percentage of 50% of unskilled and 30% skilled manpower requirement from the unemployed bona fide residents of the locality and shall be equally accessible to both women and men.

4.3.6. NHA Memorandum Circular No. 2427 Series 2012

As enabler and facilitator in the housing delivery process under RA 7279, NHA issued the Revised Guidelines for the Implementation of the Resettlement Assistance Program for LGUs designed to enhance the capabilities of LGUs outside Metro Manila to provide housing for informal settlers requiring relocation and resettlement. Target beneficiaries include displaced families or to be displaced from sites earmarked for government infrastructure projects. As partners of the program, NHA will (i) provide technical assistance to LGUs in preparing project plans and formulating policies and guidelines in implementing resettlement projects, and (ii) contribute funds (in the form of grants) for the development of resettlement sites. The LGUs, on the other hand, shall (i) contribute land for the project, and (ii) be the lead project implementer with overall responsibility for the operation and management of the resettlement project to include preparation of overall project plans, site development and housing plans, beneficiary selection, relocation of families, and estate management.

4.3.7. Executive Order (EO) No. 708

This devolves the functions of the Presidential Commission for the Urban Poor (PCUP) as the clearing house for the conduct of demolition and eviction activities involving the homeless and underprivileged citizens to the LGUs, with PCUP retaining its monitoring and reporting units (Section 1 Subsections 4 and 11). On May 2, 2012, based on EO 708, the Department of the Interior and Local Government (DILG) issued a letter requesting PCUP to preside the Pre-Demolition Conference (PDC) prior the provision of Police Assistance from the Philippine National Police (PNP) in demolition and/or eviction activities affecting the underprivileged and homeless. The PDC aims to prevent, and if not, stop the hostility and violence arising from the demolition and/or eviction of underprivileged and homeless citizens, and safeguard from hostility and violence, not only the affected underprivileged and homeless citizens, but also the representative of government agencies and police personnel, who are likewise involved in the demolition and/or eviction.

4.3.8. DILG Memorandum Circular 2009-05 (from the Amended DILG Memorandum Circular 2008-143)

This requires the proponents of evictions or demolitions to attest that all necessary steps have been taken before issuing an Eviction and Demolition Certificate of Compliance (COC). The Local Housing Board (LHB) will act as the LGU's sole clearing house for eviction and demolition activities concerning informal settlers in danger areas, public places, and government projects. It will monitor all evictions and demolitions, whether voluntary, extrajudicial, summary, or court ordered. In cases where there are no LHBs, a Local Inter-Agency Committee (LIAC) can issue the COC.

4.3.9. DPWH Land Acquisition, Resettlement, Rehabilitation, and Indigenous Peoples' Policy (LARRIPP)

The LARRIPP spells out the legal framework and donors' policies governing instances when infrastructure projects are implemented by the DPWH because of the involuntary taking of land, structures, crops, and other assets, resulting in some cases the displacement and

resettlement of affected persons. The LARRIPP enumerates entitlements and benefits that Affected Families/Persons (AFs/APs) should rightfully receive under the law based on the Project's adverse impacts on their assets, livelihood, and lives. It expounds on safeguards to be followed based on Philippine law when these affected persons are Indigenous Peoples, living inside and outside an officially declared ancestral domain. Finally, the LARRIPP delineates the institutional framework for the implementation of the policy and provides mechanisms, both internal and external to the DPWH, for monitoring and evaluating the impact of safeguard measures (e.g., Resettlement Plan, Indigenous Peoples' Action Plan).

4.3.10. DPWH DO 34, Series of 2007

Streamlining and standardizing its operating procedures, DPWH issued the DO to simplify the guidelines for the validation and evaluation of IROW claims. The Guideline is in line with the provisions of the DPWH IROW Procedural Manual adopted under DO 5 s. 2003, as amended, particularly in the validation and evaluation of claims for IROW acquisitions.

4.3.11. DPWH DO 5, Series of 2003

To identify, acquire, and manage ROW efficiently and in a timely manner for the implementation of infrastructure projects, an improved IROW process was adopted, among others. The application of this improved process shall be in accordance with, but not limited to the following procedures: (i) It shall be applicable to all foreign-assisted and locally funded projects; (ii) The Implementing Office shall ensure that IROW costs are always included in project budgets; and (iii) All ROW must be fully acquired and cleared before the issuance of the Notice of Award for the project.

This also requires determining the PAFs and the project-affected improvements based on the Cut-off Date, which will be the start of the census.

4.3.12. DPWH DO 245, Series of 2003

For this DO, the Social and Environmental Management System (SEMS) Operations Manual is "adopted for strict compliance in the preparation and implementation of social and environmental impact assessments (EIA), environmental monitoring for infrastructure projects, and other environment-related activities of the Department." The SEMS Operations Manual aims to improve the social and environmental performance of the Department, and provide guidance in complying with Philippine environmental laws and other activities, among others.

4.3.13. DPWH DO 327, Series of 2003

This is in accordance with DO 5 s. 2003 which states that, "all projects, whether local or foreign-funded projects that will require ROW acquisitions will have their respective Land Acquisition and Resettlement Action Plans (LAPRAPs) formulated." The LAPRAPs will be the basis of qualifying and compensating PAPs for lands, structures, and/or improvements affected by the infrastructure projects. The LAPRAPs shall also include the acquisition, planning, and development of resettlement sites with the responsibility resting mainly with the concerned LGUs, HUDCC, NHA, and other concerned agencies.

4.3.14. EO 20, Series of 2001

It states in Section 7 for Special Provision that "all government departments, agencies, bureaus, and instrumentalities, including government-owned and controlled corporations implementing housing projects are directed to seek the clearance and approval of the HUDCC Chairman on their respective housing and other related projects." In the advent of RA 11201 creating the DHSUD, such a mandate has been transferred from HUDCC to DHSUD.

4.4. Other Laws That Impact Involuntary Resettlement

4.4.1. RA 8972 or Solo Parent's Welfare Act

It provides benefits and privileges to solo parents and their children. It aims to develop a comprehensive package of social development and welfare services for solo parents and their children to be carried out by the Department of Social Welfare and Development (DSWD) as the lead agency and various government agencies, including Philippine Statistics Authority (PSA) and related non-governmental organizations (NGOs).

4.4.2. RA 7277 or Magna Carta for Disabled Persons

It is an act providing the rehabilitation, self-development, and self-reliance of disabled persons and their integration into the mainstream of society and for other purposes.

4.4.3. RA 9442 or An Act Amending RA 7277

It is an act amending RA 7277, which provides other privileges and incentives for persons with disabilities (PWDs), including provision of 20% discount from all establishments, like lodging, restaurants, and recreation centers for exclusive use or enjoyment of PWDs.

4.4.4. RA 9710 or The Magna Carta of Women

This law "seeks to eliminate discrimination against women by recognizing, protecting, fulfilling, and promoting the rights of Filipino women, especially those in the marginalized sectors."

4.4.5. RA 10821 or Children's Emergency Relief and Protection Act

This law requires the NHA, in coordination with DSWD, Department of Environment and Natural Resources (DENR), DPWH, DILG, and LGUs of the areas declared under a state of calamity, to immediately establish an option for transitional shelters, prioritizing vulnerable and marginalized groups, including orphaned, separated, and unaccompanied children, and pregnant and lactating mothers.

4.4.6. RA 6685 (1988)

It requires private contractors who are awarded national or local projects to hire at least 50% of the unskilled and at least 30% of the skilled labor requirements from the available bona fide residents of the province, city, or municipality where the projects are to be undertaken.

4.4.7. Batas Pambansa Bilang 344

It is an act requiring certain buildings, institutions, establishments, and public utilities to install facilities and other devices to enhance the mobility of disabled persons.

4.4.8. RA 7432

It is an Act to maximize the contribution of senior citizens to nation building, grant benefits and special privileges and for other purposes that provides the privileges for senior citizens, such as grant of 20% discount from all establishments relative to the utilization of transportation services, hotels and similar lodging establishments, restaurants and recreation centers, and purchase of medicine anywhere in the country.

4.5. Analysis of Gaps Between Philippine Laws and Policies and WB's OP 4.12

This section presents an analysis of the gaps between the national laws and the OP 4.12 as they apply to PAPs of Batch 3 Pumping Stations, and the proposed measure to fill the gap. In cases where gaps or differences are found between Philippine laws and regulations and requirements of the OP 4.12, the higher standard will prevail.

The Batch 3 Pumping Stations RAP is governed by the provisions of the RPF of this Project and part and covenants under the Loan Agreement. Table 26 is an analysis of Philippine laws and WB policies.

Table 22. Analysis of Gap Between Philippine Laws and OP 4.12

Key Issues	World Bank Policies (A)	Philippine IR Guidelines (B)	Gap between A and B	Consideration of gap between A and B
Persons Considered as PAPs	Affected people are to be identified and recorded as early as possible in order to establish their eligibility through an initial baseline survey (including population census that serves as an eligibility, Cut-off Date, asset inventory, and SES), preferably at the project identification stage, to prevent a subsequent influx encroacher of others who wish to take advance of such benefits. (WB OP 4.12, Paragraph 6)	PAPs consist of all members of a household who will be adversely affected by the Project because their present residence will be recovered by the Philippine government for its infrastructure projects. DO 05 s. 2003 requires to determine the PAFs and the project-affected improvements based on the cut-off date, which will be the start of the census.	None	PAFs SES was conducted last July 6-23, 2021 indicating the profile and count of PAFs on site. All PAFs recorded on the last day of census activities is the project cut-off date. It recorded a total of 106 PAFs within the Technical Footprints for Batch 3 PS. The July 2021 census data was the validation of information gathered by the PRRC and the DILG in 2013 and by MMDA in 2015 under the Oplan Likas Program of the Government of the Philippines to facilitate the relocation of the PAFs living in danger zones and those who will be affected by government infrastructure projects. The total number of PAFs identified under the OPLAN LIKAS Program then was 224 families. Of the 224, only 106 of them are within the TF of the MMFMP Batch 3 PS.
	Criteria for Eligibility. (C) Those who have no recognizable legal right or claim to the land they are occupying. (WB OP 4.12 Paragraph 15.c)	Section 16 of RA 7279 defines the eligibility of a PAF for socialized housing program: a. Must be a Filipino Citizen; and b. Must be underprivileged and homeless citizen as defined in Section 3 of the Act.	None	UPMO, LGUs, NHA and other relevant agencies coordinating to provide compensation for eligible persons, including resettlement sites for informal settlers according to criteria in RA 7279. All affected PAFs (except professional squatters and non-bona fide occupants and intruders of lands)

Loss of Income or Sources of Livelihood	Displaced persons should be assisted to improve their efforts and to improve their livelihoods and living standards or at least to restore them. PAFs who are below poverty line, landless, elderly, women and children, ethnic minorities, etc. (WB OP 4.12 Paragraph 8)	LARRIPP on Income Loss: "For loss of business/income, the PAF will be entitled to an income rehabilitation assistance not to exceed Php 15,000 for severely affected structures, or to be based on the latest copy of the PAF's tax record for the period corresponding to the stoppage of business activities." DPWH will coordinate with concerned government agencies for assistance in the Skills Training and Job Referrals. DO 327 s. 2003 provides transitional allowance for severely affected shop owners for their computed income loss during demolition and reconstruction of their shops. The Philippines has laws protecting women, elderly and children, persons with disabilities, and Indigenous People. However, the issue is proper implementation and attention given to these groups based on resettlement impacts.	Major government policies (e.g., RA 7279, RA 10752) are silent regarding loss of income directly resulting from land acquisition. However, the DPWH LARRIP Policy 2007 and DO 327 s. 2003 cover income loss.	Assistance of Php 15,000 per training is established in the RAP. In addition, job opportunities related to the Project are examined to be prepared based on capability of PAFs and jobs availability in the relocation sites where DPWH have projects.

Treatment of Informal Settlers	Sections 15-16 stipulate that informal settlers should be provided with resettlement assistance.	RA 7279 states that eligible homeless and poor informal settlers in urban areas are entitled to resettlement if they are affected by development projects. However, RA 7279 limits this to residential informal settlers and is silent on informal structures on public or private land used for commercial purposes. Government also excludes from the eligibility list of people who were previously resettled.	Disqualified families due to previous award of government housing.	The Project will replace lost structures and other assets of informal settlers and provide them with resettlement assistance. Those found to be disqualified due to previous award of government housing will be further assessed, and when found to have difficulty coping in the relocation site due to income/job loss will be evaluated for consideration for relocation assistance.

V. PROJECT ELIGIBILITY AND ENTITLEMENT

5.1. Criteria of Eligibility

People who are occupying and lived are at the time of census of the technical footprint are eligible for project assistance. Those who live or have structures within the TF. People have been identified through census and survey of socio-economic condition in July 2021, and this date has been announced publicly as the cut-off date to all Project-Affected Families/Persons (PAFs/PAPs) based on the RPF and in compliance with the requirements of OP 4.12 and this Resettlement Action Plan (RAP). The duration of the survey for Batch 3 Pumping Stations PAFs were conducted on July 6 to 23, 2021. The last day of the census survey was July 23 as the cut-off date.

5.2. Indicators of Severity of Impact

Project-affected structures can be affected either severely or marginally.

- Severe – the affected area of the property is 20% or more. The remaining portion of the asset is no longer economically viable for continued use. The owner of the property is entitled to full compensation in accordance with RA 10752.
- Marginal – the affected area of the property is less than 20%. It is still economically viable or livable. The compensation will be on the affected portion only at the replacement cost or using the current market value.

All 106 PAFs and 60 residential structures along the TF of the pumping stations and at the relocation site development are severely affected. All are eligible for project assistance and compensation. As planned and agreed with the PAFs, LGU, and NHA, the resettlement site will be at the NHA relocation site in Brgy. Panghulo, Malabon City. Entitlement for these affected households include the following:

- Allocation of housing units and eventual ownership of these units in Brgy. Panghulo, Malabon City;
- Transitional allowance and related support measures while on quarantine period after transfer, including required procedures for prevention of spread of COVID-19;
- Transitional allowance needed to assist PAFs with movement to the resettlement site and rental expenses, as needed, while in-city resettlement accommodations are under construction;
- Trucking/Transport assistance;
- Food pack per person;
- Health and safety kits;
- Livelihood assistance to re-establish income sources of PAFs, referrals for job placement, and assistance in securing employment certifications; and
- Investments in human development, such as skills training for family members, which are needed to improve employability and income.

The table below presents the summary of impacts and project entitlements for each category of PAFs.

Table 23. Project Entitlement Matrix

Affected	Type of Loss	Relocation Assistance
106 PAFs who are structure owners	Loss of dwelling units, potential loss of work and income from employment, and other income generating activities	• House and lot in Brgy. Panghulo, Malabon City • Transition allowance for moving to resettlement site • Moving assistance – trucks for personal belongings, and vans for women and children • Food packs • Transition allowance • Livelihood assistance to re-set up income activities, and referral for job placement including assistance in securing employment requirements • Free access to skills training and related livelihood restoration programs for male and female family members • Rehabilitation assistance in the form of skills training amounting to Php 15,000.00 per family, if the present means of livelihood is no longer viable and the AF will engage in a new income activity
All PAF household members who are renter, free occupants, and/or sharers of the structures owned by PAFs	Loss of dwelling units, potential loss of work and income from employment, and other income generating activities	• House and lot in Brgy. Panghulo, Malabon City • Transition allowance for moving to resettlement site • Moving assistance – trucks for personal belongings, and vans for women and children • Food packs • Transition allowance • Livelihood assistance to re-set up income activities, and referral for job placement including assistance in securing employment requirements

		• Free access to skills training and related livelihood restoration programs for male and female family members • Rehabilitation assistance in the form of skills training amounting to Php 15,000.00 per family, if the present means of livelihood is no longer viable and the AF will engage in a new income activity
Vulnerable PAFs	Difficulty in moving out and will require assistance during transfer, particularly the elderly, pregnant women and female-headed households, children, and PWDs	• Manpower assistance team during relocation to assist the vulnerable persons in packing their personal belongings, dismantling of salvageable materials, and hauling of their belongings • On top of the set of entitlements to be provided to structure owners, renters, or sharers, additional support from the welfare agency will be provided to ensure that vulnerable people are assisted as needed in relocation, e.g., vans for women and children, special assistance for pregnant women, PWDs, etc. • Administrative support for applying respective governmental social welfare program based on household conditions, in cooperation with concerned LGUs • Provide priority for jobs related to the project based on the capability of the PAFs

PAFs returnees from previous resettlement site	Disqualification per one-time housing benefit policy of the government	• Under the terms of the RPF and this RAP, PAFs who have previously been resettled, but have returned to places of pre-resettlement origin or in any informal settlements, are not to be excluded if they have returned because of difficulty to financially sustain themselves at the previous resettlement site due to loss of employment and income generating activities. • The PAFs in these circumstances will be screened thoroughly, and if found eligible, will be provided with the same set of assistance as enumerated above.

VI. INSTITUTIONAL FRAMEWORK AND IMPLEMENTATION ARRANGEMENT

This part describes the responsibility of the DPWH – Project Management Office who is mainly responsible for delivery of the RAP. The PMO in collaboration with relevant partner agencies such as the NHA, the LGUs and their LIAC, and relevant national government agencies mandated to implement programs and services on livelihood, public safety and social services is defined in this chapter. The PMO shall be assisted by their Consultants in the implementation of the commitments of the DPWH in this RAP that shall be carried out in a timely fashion.

Roles and Responsibilities

6.1. Project Management Office

The overall responsibility for the implementation of the Project is under the Unified Project Management Office – Flood Control Management Cluster (UPMO-FCMC) of DPWH. This will include the supervision and management of the Project, in coordination with other relevant offices within the DPWH and the KSAs (NHA) for the relocation of PAFs. It is also tasked to ensure that funds for the timely implementation of RAP are available and properly accounted for.

The UPMO-FCMC will be assisted by the ESSD as per DO 58 s. 2004 in providing technical guidance and support in the implementation of the RAP. All activities related to the RAP preparation and implementation will be periodically reported from the DPWH to the WB, and the RAP will be concurred by the WB prior to its full implementation.

6.2. The ESSD and the LGU' Resettlement Implementation Committee

The processing and disbursement of funds to the implementing partners will be carried out by the UPMO-FCMC and at all times be consistent with existing government Accounting and Auditing Guidelines and Procedures. It will also be responsible for the resettlement and safeguards activities as listed below:

- Overall preparation and planning of the RAP;
- Submit RAP Budget Plans (to include compensation, relocation costs, and operations) for approval and allocation of needed resources by the DPWH Central Office;
- Amend or complement the RAP in case problems are identified during the Internal and External Monitoring of its implementation; and
- Collaborate with the ESSD in monitoring the actual payment/disbursement of compensation/entitlement to PAFs.

The ESSD shall provide technical guidance and support in the implementation of the RAP.

The table below shows the composition of the LIAC or City Resettlement Implementation Committee (CRIC).

Table 24. Composition of LIAC

Position			Member
1	Board Members		Chairman: Mayors of LGUs affected by the Project Co-Chairman: DPWH
2	Members	City/Municipal representatives	• LGU's Legal Office • Head of the Urban Poor Affairs Office (UPAO)/Urban Settlements Office (USO)/Human Resource Office (HRO) • Head of the City/Municipal Social Welfare Office (CSWO/MSWO)
		National Government Agency (NGA) representatives	• MMDA • DHSUD • NHA • Commission on Human Rights (CHR) • PCUP • DILG • Other government agencies for livelihood and skills training provision at the local level, e.g., Department of Labor and Employment (DOLE), Technical Education and Skills Development Authority (TESDA), and Department of Trade and Industry (DTI)
		Representatives from PAFs	
		Barangay Chairman along the ROW	
		NGO/CSO	

The LIAC can be composed of the subcommittees including all or any of the following:

- Social preparation with community organizing;
- Beneficiary selection, awards, and arbitration;
- Legal and security; and/or
- Relocation and livelihood restoration.

The LIAC or CRIC will be composed of City/Municipality representatives, representatives of affected barangay/s, and PAFs. Its specific functions are:

- Assist the DPWH staff in (a) validating the list of PAFs, (b) validating the assets of the PAFs that will be affected by the Project (using a prepared Compensation Form), and (c) monitoring and implementing ROW acquisition and resettlement;
- Assist the DPWH staff to engage in Public Information Campaign, and Public Participation and Consultation;
- Assist DPWH in the payment of compensation/entitlements to PAFs;
- Receive the complaints and grievances from PAFs and other stakeholders and act accordingly;
- Maintain a record of all public meetings, complaints, and actions taken to address complaints and grievances; and
- Assist in the enforcement of laws/ordinances regarding encroachment in the project site or ROW.

The CRIC will be formed through a resolution from the existing LGU-LIAC adapting the project. A strong and close coordination on livelihood restoration and rehabilitation will be carried out by the UPMO-FCMC with the LGUs.

The NHA will be responsible for implementing the in-city relocation plan of 106 PAFs. Specifically, the NHA will:

- Assist the LGU Malabon in setting up and capacitating its Housing and Resettlement Team to handle the day-to-day operation and implementation of housing and resettlement activities;
- Ensure that the relocation site for the 106 PAFs are compliant with the MMFMP1 RPF and this RAP;
- Engage with NGOs/CSOs or community groups to be involved in resettlement undertaking social preparation, facilitating understanding the project entitlements as appropriate, and arranging for capacity-building of community associations in coordination with the UPMO-FCMC;
- Work with government agencies in implementing the livelihood programs;
- Engage service providers (CSOs and other support or resource agencies) to plan and implement livelihood support activities for PAPs resettled in NHA resettlement site within the City of Malabon; and
- Designate project personnel that will work with LGUs to ensure that the RAP is properly implemented.

The LGU will be required to establish a multi-disciplinary Housing and Resettlement Team (HRT) to oversee and support the day-to-day implementation of resettlement activities. The HRT will be composed of staff drawn from relevant LGU Offices (UPAO/USO, CSWO, City Planning Office, and City Engineering Office, and if need be, will be supported by LGU personnel from Budget Office, City Planning and Development Office, and City Environment and Natural Resources Office). Specifically, the LGU HRTs, with the assistance of NHA, will be:

- The UPMO with assistance of LGU leads in organizing and conducting consultations, arrangements for community participation, and public disclosure;
- Assigning a community contact person and informing PAPs and affected communities of their schedule of availability, their location/meeting place when in the affected area, and their contact information, such as cellular or telephone number;
- Lead in providing RAP-level grievance management for subprojects with UPMO-FCMC if the type of grievances is Type B performance and obligation where it should be resolved at the level of LGU-HRT.(refer to Table 39 – Responsibility Matrix of Grievance Management);
- Using criteria established by the UPMO-FCMC and, with assistance from NHA, monitor and track RAP implementation progress and flag key issues which may affect timely completion; and
- Preparing and providing monthly RAP monitoring reports to UPMO-FCMC.

6.3. LGU Offices

Aside from these main roles of the LGU HRTs and the LIAC, LGU offices will carry out specific tasks such as:

6.3.1. LHB, Local Housing Office, or City Urban Development and Housing Office

- Guiding the UPMO-FCMC to acquire the Certificate of Completion (COC) prior to the displacement of PAPs and dismantlement of structures; and
- Maintaining and managing relocation sites (post-relocation).

6.3.2. LGU's Public Employment Service Office (PESO) or Livelihood Office

- Identifying local livelihood programs that can include PAPs;
- Providing information on local employment that can be offered to PAPs; and
- Prioritizing matching and provision of jobs to PAPs.

6.3.3. LGU's Engineering Office

- Providing information or building plans of affected structures; and
- Facilitating the fast issuance of building permits for relocation sites.

6.3.4. LGU's CSWO

- Implementing the provision of rehabilitation assistance to vulnerable groups amounting to Php 15,000 per household in the form of vocational training and development;
- Re-evaluating the profile of vulnerable PAPs who are not yet beneficiaries of DSWD programs, assessing their eligibility, and facilitating membership to DSWD programs if found qualified;
- Providing social workers or caregivers to vulnerable households during relocation; and
- Providing social workers to monitor vulnerable families after relocation.

6.3.5. LGU's Business Permits and Licensing Office

- Facilitating the fast issuance of business permit and licenses for affected businesses; and
- Creating a special lane/window for affected businesses and fast-tracking applications for permits and licenses.

The UPMO-FCMC will work closely with DHSUD, formerly HUDCC, to ensure coordinated action between the shelter agencies and that the RAP is implemented in accordance with the MMFMP1 RPF. Figure 10 below shows the organizational structure for the RAP.

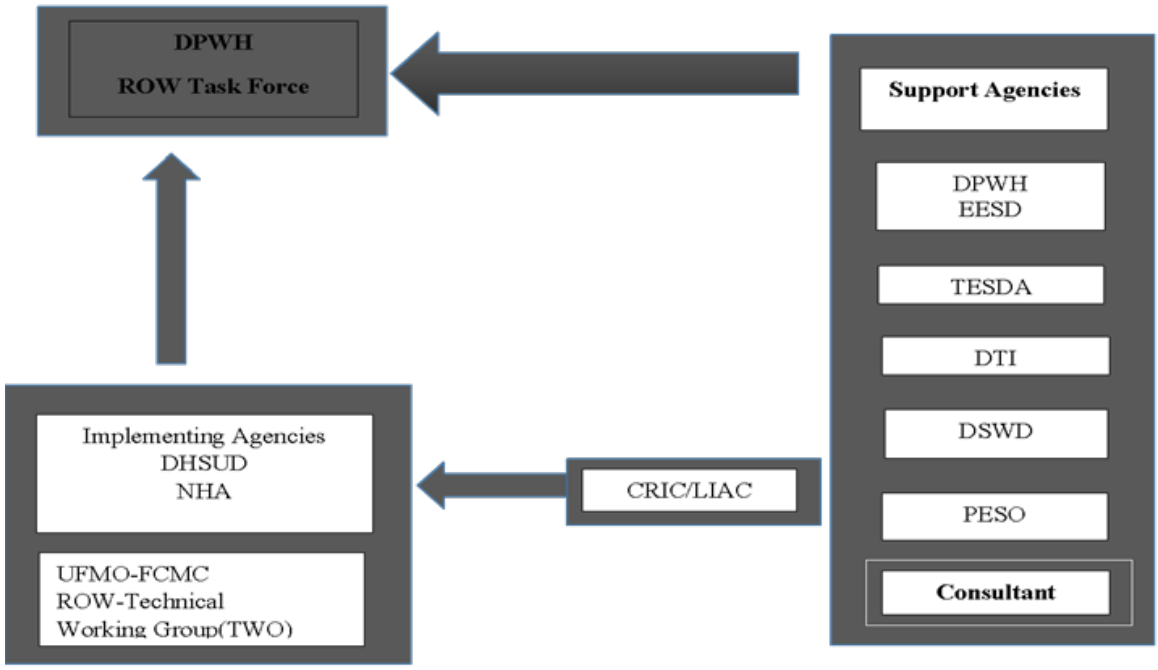

Figure 10. UPMO-FCMC with NHA and LGUs

The responsibilities of the affected people during the compensation process is to bring necessary documents (identification card with photo, Barangay Certificate or Community Tax Certificate, and other relevant proof of ownership or identity). They should also review carefully all compensation documents and ask DPWH for any clarification or explanation, if required. If the affected people are not satisfied with the compensation payment, or if there is a disagreement between an affected person and DPWH, the grievance redress committee should be approached for assistance. If the affected people find the compensation documents in order, they will sign the said documents and acknowledge receipt of the compensation payment. One copy of all compensation forms should be obtained. The affected people will clear the work area within the specified time provided by DPWH.

VII. RELOCATION AND RESETTLEMENT PROCESS

The DPWH will adopt the Project Resettlement Policy for MMFMP, consistent with national laws and regulations, and WB policies, all affected families will be provided assistance based on the entitlement matrix to ensure that PAFs can restore their pre-project standard of living at the earliest possible time.

7.1. Relocation Assistance for PAFs Residing in Affected Structures

The Entitlement Matrix outlines the specifics of the support provided for all relocation options namely self-relocation assistance and resettlement assistance options. All affected structures within the technical footprint have been assessed based current market price of construction materials of housing units make and type of materials used. Table below describes the average sizes and cost per square meter and the average cost of housing units.

Pumping Station	Barangay	No. of ISFs	No. of Structures	Average Area Affected per Sq.m.	Make	Avegare Cost per Sq.m.	Estimated Cost per Structure
Herrera	Ibaba	19	6	12	mixed of light and concrete materials	8,500.00	102,000.00
Niugan	Niugan	2	1	20	Concrete Materials	10,000.00	200,000.00
Artex	Panghulo	4	3	12	Mixed of salvaged and light Materials	8,000.00	96,000.00
Merville-Dampalit	Dampalit	3	2	12	mixed of light and concrete materials	8,500.00	102,000.00
Acasia	Tenajeros	28	12	12	Mixed of salvaged and light Materials	8,000.00	96,000.00
Balot	Hulong-Duhat	3	3	12	Mixed of salvaged and light Materials	8,000.00	96,000.00
Relocation Site Development	Maysilo	47	37	12	mixed of salvaged, light and concrete materials	8,300.00	99,600.00

The average size of current housing units is 12 square meters. One structure with a size of 20 square meters has been recorded. The average cost per square meter is at PhP 8,500 for mixed of light to concrete materials and Php 10,000 for housing unit with concrete materials.

7.2. Rehabilitation Assistance

The PAFs whose livelihood becomes unviable due to the Project and who will have to engage in a new income activity are eligible to participate in the Livelihood Restoration and Improvement Program (LRIP).

7.3. Special Assistance for Vulnerable Groups

The PAFs who belong to any of the following vulnerable groups: (i) households that belong below the poverty threshold, (ii) households headed by the elderly, (iii) households with PWDs, and (iv) households headed by a solo parent are expected to face greater challenges in re-establishing their living standards. For the vulnerable groups/PAFs with persons needing special assistance and/or medical care, the LGUs concerned will provide nurses or social workers to help them before and during resettlement activities. The beneficiaries of such assistance include households with pregnant women, the elderly, ill family members, young children, and people with physical and/or mental disabilities.

7.4. Resettlement Assistance Options

Under this RAP, Assisted Relocation will be provided. This option is to avail of permanent housing through socialized housing for PAFs. The DPWH will ensure that no PAF will be forcibly evicted or that no structure will be demolished without prior notice and consultation. All qualified PAFs will be assessed and validated by the NHA.

7.5. Establishing Mechanism and Institutional Arrangement for Assisted Relocation

Program mechanisms and institutional arrangements with concerned government agencies have to be established prior to displacement of PAFs to ensure that the relocation assistance will be provided in a timely manner.

7.6. Development of Socialized Housing (NHA Relocation)

The development of socialized housing for qualified PAFs will be undertaken by NHA/LGU. The DPWH and NHA/LGU will need to execute a MOA for this purpose. The DPWH will provide the funds while NHA/LGU will dispense technical support for its implementation.

7.7. Implementation Procedure for Assisted Relocation

Pre-Relocation Stage Procedure for NHA Assisted Relocation

There will be consultations with PAFs. Census and tagging activities with SES will be carried out and the result of which will be processed and analyzed as input for the RAP preparation. The initial masterlist generated will be used in the implementation of RAP activities herein. Prior to implementation, DPWH has to establish institutional arrangements through MOAs with NGAs, LGUs, and push for the formation of LIAC. Once these institutional arrangements have been created, DPWH will proceed to implementation.

Pre-Displacement Procedure for Non-Residents Prior to Cut-Off-Date

There will be instances when, during validation, DPWH/LIAC/NHA may encounter families living within the Project's ROW or TFs who are not on the masterlist. Some families may claim that they were out-during-census, or there could have been a misstatement of information in the census data. In cases like these, the validation team must conduct investigation and gather further evidence to establish the fact that the family was indeed in the ROW prior to the cut-off date.

Actual Relocation

Upon satisfaction of all pre-relocation activities and requirements, the relocation site should be ready for occupancy.

Post-Relocation

After relocation of PAFs to the permanent resettlement site, monitoring of their condition will be continued and assistance will be made accessible to them. Should the relocation site be located in an LGU that is not among the project-affected, LIAC will be created prior to actual relocation. NHA will deploy their community relations officer

or DPWH will hire community mobilizers to conduct regular site visits and house-to-house visits.

7.8. Integration with Host Population

Prior to any relocation activities, DPWH will conduct consultations to the receiving barangay and host communities to identify existing facilities and available social services, and prioritize the services and assistance that the receiving LGU, barangay, and host communities may need to be able to accommodate and manage the sudden influx of PAFs in their community.

Under the Local Government Code (RA 7160) and the Urban Development and Housing Act (RA 7279), provision of socialized housing is a mandate of the LGU. Thus, for in-city resettlement, DPWH will not provide financial assistance to the LGU; however, may provide facilities for basic social services to augment the existing facilities in the host barangay.

For the Component 3 of MMFMP, NHA agreed with the implementing agency to provide relocation and resettlement assistance. The demarcation of responsibilities as indicated in the project appraisal document is that NHA will manage the relocation activities.

This RAP will be covered by NHA and discussion on the resettlement description of the resettlement sites are provided in this section of the RAP.

7.9. Resettlement Program Approach with NHA

The resettlement site under NHA is in Brgy. Panghulo, Malabon City. The NHA resettlement site in Brgy. Panghulo is one of the socialized and low-cost housing projects of NHA, which would benefit the PAFs living in the waterways of 7 pumping stations in Malabon City that would be affected by the government infrastructure projects. NHA's resettlement program for the Batch 3 has similar features with the housing units awarded to Vitas PAFs in Trece Martirez Cavite. Although for Vitas PAFs, the type of housing development is horizontal/ sprawling on a 40 square meter lot to each beneficiary as indicated in the Vitas RAP. For the Batch 3 PS PAFs relocation development is a vertical housing unit in a 5-story walk up building with the following features for each unit:

- Units are equipped with electrical connections prior to transfer and occupancy;
- Units will have supply of water through the elevated tanks, and when fully operational, provide individual connections; and
- Each housing unit is a typical one-bedroom unit with toilet and bath, kitchen sink, and an outdoor multi-purpose work area per unit.

Figure 11. Resettlement Site in Malabon City

On September 07, 2022 coordination meeting with NHA and LGU, it was confirmed that the 106 PAFs will be accommodated in Brgy. Panghulo resettlement site; however, the units should be replenished by the Project to accommodate more PAFs outside the TF of the Project. The NHA and LGU, with DPWH, will develop a relocation site to build five 5-storey low-rise building to accommodate 106 PAFs (60 units per building).

This resettlement site has an area of 1,500 square meters with a total of 1,380 units. The average floor area is 24 square meters. The total house and lot cost is Php 796,536.24 based on the ceiling price and as prescribed in HUDCC Resolution No. 2 s. 2018. The size of the housing units in the proposed relocation site is bigger than the average size of their current housing units located in the water ways where the Pumping Stations will be rehabilitated. The relocation site built by NHA will be provided with basic utilities such as electricity, water and access to telecommunication facilities at the account of the owner. All PAFs given with a unit shall be given certificate of award for them to have a perpetual occupancy under the usufruct agreement.

The NHA issued a Memorandum Circular No. 2021-021 or the Omnibus Policy on Sales and Disposition for Residential Lots/Lots with Housing Units/Units Condominium Units to prescribe uniform guidelines to govern the sales, disposition, and to secure tenure arrangement covering all residential units of the Authority. In these guidelines, it specified that usufruct agreement shall be adopted since the relocation site is a low-rise building, wherein ownership of the land cannot be conveyed with the beneficiary. The period of usufruct is 30 years and renewable for an additional 20 years, or on the life of the building, and the mutual agreement of the parties and the usufructuary right shall not be transferable to other parties except in cases of hereditary succession or to his substitute or next of kin.

In March 30, 2023, a General Assembly was conducted in St. Gregory, Brgy. Panghulo resettlement site, which was attended by 40% of the PAFs, with DPWH, LGU, and NHA representatives presenting the usufruct agreements with these PAFs. It was clarified that although it was a usufruct agreement, they will be given an award that they own the unit they

are paying for 30 years. The discussion also includes the payment schedule of each unit per floor and the arrangement with the PAFs, while waiting for the final selling price of the unit.

Hereunder is the computation of each unit per floor for 24 months (2 years):

Floor	Monthly Payment (Php)
1st	550.00
2nd	500.00
3rd	450.00
4th	400.00
5th	300.00

After 2 years of monthly payment, the PAFs will start paying the selling price of each unit ranging Php 1,500 – Php 2,000 per month for 28 remaining years. The amount paid will be accumulated and be deducted to the selling price.

Figure 12. Location and Vicinity Map of Oreta Compound

Figure 13. Perspective View of Buildings to be Constructed in Oreta Compound

NHA has identified two (2) proposed sites to be developed, located in Brgy. Dampalit and in Oreta Compound, Brgy. Maysilo, Malabon City. However, Oreta Compound in Brgy. Maysilo, Malabon City is the best option. NHA will still check the title of land. 47 PAFs are occupying the land. The current PAFs occupants of the land shall be included by NHA in the list of awardees for the housing units that will be awarded together with the PAFs of this project.

Figure 14. Oreta Compound

VIII. LIVELIHOOD RESTORATION AND INCOME REHABILITATION PLAN

This chapter outlines the strategies and plans in the recovery of the livelihood of the affected PAFs because of the project intervention. The chapter assesses the effects, proposes mitigating measures, and provides recommendations such as economic activities to alleviate the adverse effect on the livelihood of PAFs.

Malabon City is primarily a residential and industrial town and is one of the most densely populated cities in Metro Manila. In the 2015 census, Malabon City reached a total population of 365,525 with a 3.8 poverty incidence, which is second highest in the National Capital Region (NCR). Majority of the livelihoods of individuals residing in the city fall under the category of employed workers either in government and or private entities. Also, evident in the busy streets of the city are people working under the informal sector (entrepreneurs/small business owners with no permanent shop for them to carry out their occupation and move around in bicycles and other vehicular means), such as cobblers, and vegetable/fruit, toy/balloon, and street food (taho, ice cream, fishball) vendors. There are also self-employed individuals who invested in micro-businesses like sari-sari stores, local eatery, cooked food vendors, and meat/fish vendors, among others.

Means of living may be temporarily disrupted due to the rehabilitation of the pumping stations, since this will constitute relocation of affected communities. Affected communities are the following barangays: Dampalit, Ibaba, Niugan, Panghulo, Hulong-Duhat, and Tinajeros, and Maysilo for relocation site development.

Increased challenges from the displacement of affected communities are seen due to the effects of COVID-19 pandemic on their livelihood. Countless Filipinos suffered from reduction of income, if not, from the loss of their livelihood due to mass lay-offs and establishment closures, workforce rotation, and movement restrictions. Food-and-beverage-(restaurants/food chains) and beauty-and-leisure-related (salon, spa, theaters, and the like) businesses had to cease their operations. Public transportation (taxi, jeepney, and tricycle) operations and construction works were temporarily halted or were operational but under controlled number of workers/batches. Income from small businesses like that of sari-sari stores, local eatery, and street vending were greatly affected as well.

Moreover, the restoration and income rehabilitation of the affected area in the City of Malabon may also encounter challenges on the following aspects:

- Human aspect, which pertains to skills, education, knowledge, attitude, mindset, and behavior of the PAFs (e.g., willingness to learn new skill/s, mindset, and behavior of the people towards the program);
- Social/political aspect, which pertains to stakeholders commitment and acceptance (e.g., social acceptance for the Project and involvement of the stakeholders in the implementation process);
- Physical/technological aspect, which covers relocation site, school, hospital, public market, and transportation (e.g., accessibility of the site to different amenities, facilities, and services);
- Financial aspect, which covers the provision/access to funds and financial aids (e.g., availability of sufficient funding and/or financial aids for the restoration of livelihood and conduction of economic activities); and
- Natural/Environmental aspect, which pertains to available resources (e.g., resources must be evident in the area).

8.1. Objectives of the Community-based Livelihood Restoration and Development Program (CLRDP)

The CLRDP gives focus in providing assistance in restoring their livelihood of the PAPs residing along the TFs of the pumping stations in the restoration and development of their livelihoods, prior to and after relocation. Wage-based PAPs and those who are entrepreneurs are expected to restore their employment and businesses with the help of entitlements provided by the government. The PAFs, together with vulnerable individuals who are interested in forming a cooperative or people's organization for livelihood opportunities and empowerment purposes, are also expected to be assisted by the government.

This CLRDP provides implementing guidance, activities, and strategies in restoring the means of income. Building back plus strengthening the opportunities to the said affected populaces is also giving them a sustainable and holistic approach to livelihood.

For this RAP, the PAFs are categorized as follows:

- Employed or wage-based income earners are those who earn a living as private or government employees, unskilled or skilled workers providing services or involved in the transportation, construction, or production (factory workers) industry, and OFWs;
- Enterprise-based livelihood workers are those who manage or operate their own businesses (sari-sari store owners, online sellers) or those who are involved in vending;
- Those individuals who do not earn a living or are simply unemployed;
- Those with no answers; and
- Remittance receiver are those receiving pensions.

Furthermore, income source is categorized as primary or secondary using the definition below:

- Primary Income Source, which is earned by the head of the family
- Secondary Income Source, which is earned by a member of the household.

The table below presents a summary of the categories of PAFs for relocation, which will be assisted under the CLRDP. The resettlement site is in Brgy. Panghulo, Malabon City.

Table 25. Summary of Categories of PAFs

Category	Barangay						Total	%
	Dampalit	Ibaba	Niugan	Panghulo	Tinajeros	Hulong -Duhat		
Primary Source of Income of the PAFs								
PAFs who are employed or wage-based income earners	3	16	2	3	11	3	38	64%
PAFs who are into enterprise-based livelihoods	0	0	0	0	0	0	0	0%
None	0	1	0	0	2	0	3	5%
No Answer	0	0	0	0	0	0	0	0%
Pensioner/ Remittance Receiver	0	0	0	1	3	0	4	7%
No Data	0	2	0	0	12	0	14	24%
TOTAL	**3**	**19**	**2**	**4**	**28**	**3**	**59**	**100%**
Secondary Source of Income of the PAFs								

PAFs who are employed or wage-based income earners	1	10	1	1	13	3	29	41%
PAFs who are into enterprise-based livelihoods	0	0	1	1	1	0	3	4%
None	3	9	0	4	8	2	26	37%
No Answer	2	2	0	0	7	0	11	15%
Pensioner/ Remittance Receiver	0	0	0	1	1	0	2	3%
TOTAL	**6**	**21**	**2**	**7**	**30**	**5**	**71**	**100%**

8.2. Methodology for Developing the CLRDP

The methodologies that were used to gather the profile of PAFs for the development of this LRIP are (i) SES, (ii) FGDs, (iii) Key Informant Interview (KII), and (iv) Training Needs Assessment (TNA). Coordination meetings with the LGU Malabon, particularly the PESO, was also conducted.

8.3. Livelihood Survey

The first round of SES was conducted from July 05 to 20, 2021. The second round, which was a joint validation together with DPWH and the Barangays, was conducted from July 14 to 15, 2021. During the joint validation, interviews with barangay officials were conducted to gather information on livelihood programs of each barangay.

8.4. Focus Group Discussions

The FGDs were conducted in three (3) separate sessions. The first session was an online FGD for Brgy. Ibaba, which was participated by PAFs and barangay officials on September 14, 2021. The FGDs with PAFs in Brgy. Tinajeros were then conducted on October 07, 2021. Highlights of the discussions were (a) concerns and expectations related to employment and other livelihood once resettled, and (b) expected tasks of the government in the implementation of the livelihood restoration program in the resettlement site, the role of the business sector and CSOs, and the role of the cooperative/people's organization in providing jobs and small business for them.

8.5. Training Needs Assessment

The TNA was conducted after the Stakeholders' Consultation Meetings (SCMs) in the first week of April 2022. A total of 59 PAFs (26 males and 14 females) were covered in the TNA. Table below shows the desired training needs as identified by the PAFs and their family members.

Table 26. Desired Training Needs of Household Heads and Members

Category	Desired Training	Number of PAFs							
		Household Head				Household Member			
		Male	Female	Total	%	Male	Female	Total	%
Manufacturing Sector	Automotive	3	0	3	5.08	3	1	4	6.1
	Welding NC II	1	0	1	1.69	1	0	1	1.5

Tourism and Hotel Management	Cooking	0	1	1	1.69	1	2	3	4.5
	Food and Beverage	0	0	0	0.00	0	0	0	0.00
	Housekeeping	0	1	1	1.69	0	1	1	1.5
Transportation	Driving	1	0	1	1.69	2	0	2	3.0
Others	Finance and Lending	0	1	1	1.69	0	1	1	1.5
	Franchising and Managing Food Business	1	1	2	3.39	0	1	1	1.5
	Rice Business for Retail and Wholesale	1	0	1	1.69	0	1	1	1.5
No Answer		3	2	5	8.47	12	10	22	33.3
No Data				19	32.20				
TOTAL		**26**	**14**	**59**	**100**	**36**	**30**	**66**	**100**

The category for "No Answer" include PAFs who are either senior citizens who can no longer avail skills training and/or household heads who are permanently employed (e.g., MMDA operators). "No Data" refers to household heads who are currently working and/or not available due to personal errands during the survey/interview.

8.6. Livelihood Market Assessment

Analysis of livelihood demand and supply was conducted during the first site visit of the pumping stations from March 03 to 05, 2021 to determine the type and categories of employment and enterprises that would be provided to the PAFs.

8.7. Labor Market Information (LMI)

The LMI was gathered through the conduct of an online KII on October 25, 2021. The results were evaluated against potential benefits on the employment of PAFs. The information was used to establish potential opportunities that can be offered to PAFs particularly in construction-related work.

8.8. Key Informant Interview (KII)

KII was held with the City Social Welfare Development Department (CSWDD), PESO, Cooperative, City Planning Office, and DTI Negosyo Center on October 25, 2021. The consultation gathered information on available short-training programs and other livelihood support for the PAFs.

8.9. Potential Livelihood Impact

Of 106 project affected families, 94 households were identified as wage earners, and 12 are households are into micro- business. Since the relocation site is also located in Malabon, employment disruption impact will likely be experienced by the PAPs during transfer and relocation. Although temporary in nature, potential reduction of their take-home pay due to no work, no pay policy. Table below presents livelihood/income category

Table 27. Summary of Impact for Categories of PAFs, Proposed Livelihood Rehabilitation Measures, and Recommended Livelihood Assistance

Category	**Number of PAFs**
Wage earners	94 households
Affected micro-businesses	12 marginally affected business owners
Vulnerable: elderly, solo-parent-headed households with dependents	• 17 solo parent headed households • 11 elderly

8.10. Livelihood Rehabilitation Measures

Project entitlements for PAFs are focused on employment and entrepreneurial development skills training programs, with starter kits and job referral interventions. PAFs are entitled to be assisted in the form of skills training with daily allowance and starter kits amounting to Php 15,000 per PAF. This amount is to be provided in coordination with the LGU through the LIAC/CRIC (please refer to Table 17 and Table 31).

Table 28. Summary of Categories of PAFs, Proposed Livelihood Rehabilitation Measures, and Recommended Livelihood Assistance

Category	Number of PAFs	Summary of Entitlements	Additional CLRDP Support Provided
Wage earners	94 households		Yes
Affected micro-businesses	12 marginally affected business owners	• Cash compensation for income losses • Assistance in securing soft loan to restart business • Participation in CLRDP	Yes
Vulnerable: elderly, solo-parent-headed households with dependents	• 17 solo parent headed households • 11 elderly	Participation in CLRDP including skills training and other development activities	Yes
Note: The table is only a summary of applicable livelihood entitlements for PAFs in this RAP.			

Another support to be provided to PAFs, under the group assistance and/or loan, are the (i) formation of people's organization/cooperative and capacity-building, as well as (ii) seed capital amounting to Php 1,500,000.00 for the registered people's organization/cooperative in the resettlement site. These entitlements are to be coordinated with the LGU through LIAC/CRIC. The PAP's spouses and household members of legal age who do not have any income generating activity are entitled to be part of the group assistance and/or loan.

8.11. CLRDP Approach and Strategy

Based on the results and findings, the priorities stated below have been formed and developed into a Livelihood Restoration and Development Framework.

8.11.1. Community-based Approach

This refers to the approach where PAFs are encouraged to actively participate in the identification of issues/concerns and solutions as decision makers. This approach works around the theory that as project-affected individuals, they know what is best for them. In this case, the PAFs are involved in identifying and deciding on the kinds of Skills Training Courses they intend to attend, and the type of livelihood support they wish to have. They may choose to restore or opt to learn new alternative livelihoods in the respective resettlement site. The most vulnerable among the PAFs (i.e., the elderly and female-headed households) shall also be given additional attention to ensure they progress or develop along with the rest of the PAFs

8.11.2. Community-led Development Approach

This refers to the process of working together to create and realize locally-owned visions and goals. Since the PAFs are greatly involved, they are the very ones who could formally initiate and then organize themselves as a group to restore, develop, and sustain their livelihoods. They have the continuous opportunity to plan, implement, monitor, and evaluate their organization as well as their livelihood projects and activities once they are

transferred to the resettlement site. The role of related government agencies and CSOs would mainly be to support project implementation and capacity-building of the established Community-Based Organization (CBO).

8.12. Phases and Classifications

Under the CLRDP, two phases with three classifications will be implemented: Phase 1, as Pre-Relocation, where (i) immediate support will be embarked, and Phase 2, as Post-Relocation, where (ii) short-to-medium-term assistance and (iii) long-term restoration interventions are to be followed for livelihood and development-related undertakings.

Table 29. CLRDP Phases and Classifications

Phase	Description	Classification
1	Pre-Relocation (prior to transfer of eligible PAFs)	Preparatory Support (social preparation, community mobilization, and values formation will be done at this level)
2	Post-Relocation (upon transfer to resettlement site)	Short- to Medium-Term Assistance
		Long-Term Restoration and Development Intervention

In Phase 1, prior to the transfer, preventive measures will be done to mitigate, if not, avoid any disruption of their income when they transfer to the resettlement site. Correspondingly, social preparation, community mobilization, and values formation will be done at this level. Under the Pre-Relocation Phase, the hiring of qualified workers/laborers within the parameters of the pumping station rehabilitation project will be considered.

The Phase 2 will be carried out upon the PAP's transfer to the resettlement site. The PAP's skills on employment and enterprise will be developed further through the provision of training and development programs from related government agencies. Job matching and business referrals will be undertaken. The formation and capacity-building of CBOs for livelihood purposes as a long-term development intervention will be put into effect under the LGU.

8.13. Major Activities and Involved Agencies

The CLRDP has several major activities that need to be executed as soon as both the sending and the receiving LGUs, together with related government agencies, agree on the timetable of the Project's implementation. The table below summarizes the CLRDP's phases and classifications together with the major activities under each phase.

Table 30. Major Activities under CLRDP Phases and Classifications

Phase	Classification	Major Activities
Pre-Relocation	Immediate Support	Orientation on Social Preparation and Community Mobilization for Livelihood Restoration
Post-Relocation	Short- to Medium-Term Assistance	Financial Literacy Seminar and Entrepreneurial Assessment
		Income restoration category selection
		Employment Assistance Track

Phase	Classification	Major Activities
		(Job Skills Training and Job Referral)
		Enterprise Development Track (Entrepreneurial Skills Training with Starter Kit and Provision of Assistance to Secure Soft Loans from the Government)
	Long-Term Restoration and Development Intervention	Community-Managed Multi-Purpose Services Cooperative Formation and Development: o Pre-Membership Seminar o Constitution and By-Laws Formulation o Registration with Government Agency o Three-Year Strategic Planning Workshop o Year 1 Action Planning o Human Resources and Outsourcing Services Planning Workshop o Organizational Development Training and Planning Workshop o Operations, Financial, and Marketing Management Training/Workshop
		Building Partnership and Marketing Endeavors

8.14. Description of Types of CLRDP Activities

8.14.1. Orientation on Social Preparation and Community Mobilization for Livelihood Restoration

The CLRDP will have to begin with orienting the legitimate PAFs on social preparation and community mobilization towards livelihood restoration. The KSA (NHA) and the City of Malabon (CSWDD) have to address the PAFs' expectations in the resettlement area. Likewise, the involved agencies will have to introduce the essence of community-managed livelihood services to the PAFs. The expected outcome is for the PAFs to consider taking the initiative in the formation of a community-based organization for livelihood restoration and development. The community of PAFs, both men and women as well as vulnerable individuals, should take into consideration having equal entitlement to livelihood restoration and improvement measures.

8.14.2. Conduct Research on Possible Study Tour and Benchmarking on Community-based Livelihood Program

Concerned LGU offices, together with the IA, will conduct research on possible good practices of the nearby LGU livelihood program and activities. The beneficiaries will also participate in the benchmarking as learners for a successful and sustainable livelihood implementation. They will also be exposed to various models of community-based

activities for adaptation and enhancement. These models are (i) social enterprise, (ii) community-managed business, (iii) entrepreneurship, and (iv) marketing, among others.

8.14.3. Financial Literacy Seminar and Entrepreneurial Assessment

Families with breakeven household net income shall be subjected to Capacity Development Training in Financial Literacy and Savings Program. The DTI and PESO will provide this one-day seminar and also assess eligible PAFs for entrepreneurial skills.

The objective of the seminar is to raise the awareness of PAFs on savings, expenditures, access to financial services, and investment options. Likewise, each PAP will be able to determine whether he/she is an entrepreneur or not. In this way, an individual may decide whether he/she would be into business or not, or learn more to become a successful entrepreneur. Such one-day seminars will be participated by the household heads and their spouses to foster unity and cooperation when engaging in joint decision-making on finances. Table below shows the suggested topics to be discussed in this seminar.

Knowing Your Financial Standing	Letting Your Money Grow/Intelligent Investment
Savings and Expenditures	Financial Fitness Quiz
The Right Formula of Saving	Entrepreneurial Test
Family Income and Expenditures	Prioritizing Your Expenses

8.14.4. Job Skills Training and Job Referral

The TESDA has a wide range of available vocational and technical skills training courses, which could be attended by eligible PAFs. The TESDA, together with PESO, shall provide job skills training programs based on courses identified by PAFs. Such courses are aimed at furthering the development of their current skills, or the learning of new skills. Values formation and gender sensitivity topics shall be included in the training courses.

In addition to TESDA's available skills training/courses, PESO has partnered with universities and schools within the city, providing short-term courses that are also accredited by TESDA. The table below shows the Skills Training/Courses available for PAFs to choose and take.

Table 31. Employment Skills Training Courses

Category	**Skills Training Courses**
Automotive	Automotive Body Repairing
	Automotive Engine Rebuilding
	Automotive Body Repainting/Servicing
	Automotive Electrical Assembly
	Automotive Mechanical Assembly
Footwear and Leather Goods	Footwear Making
Furniture and Fixtures	Furniture Making
Garments	Dressmaking
	Tailoring
General Infrastructure	Carpentry
	Construction Painting
	Electrical Installation and Maintenance

	Masonry
	Pipefitting
	Welding
	Backhoe Operation
Health, Social, and Other Community Development Services	Caregiving
	Domestic Work
	Hairdressing
	Wellness Massage
	Massage Therapy
	Security Services
Transportation	Driving
Metals and Engineering	Gas Metal Arc Welding
Processed Food and Beverages	Food Processing
	Slaughter Operations
Semiconductor and Electronics	Computer Systems Servicing
	Consumer Electronics Servicing
	Offset Printing
Tourism (Hotel and Restaurant)	Commercial Cooking
	Food and Beverage Services
	Housekeeping

With the CLRDP's assistance, the costs of training per individual in this Project will be up to Php 15,000. The amount covers for the training fees, allowance, and loss of income compensation. The TESDA may shorten its skills training course by developing its particular modules according to the specific needs of PAFs, or follow its available courses with longer-day period. The PESO will be the focal entity for getting information pertaining to skills training programs.

After completion of the training, the PESO will have to mainstream the job matching and referral activities by initiating regular job fair events at the resettlement site. In this case, the local government would be in close contact with PAFs with regards to their job needs and other related concerns, which could result in immediate action afterwards.

In addition to job referral, current skills of PAFs were identified after the results of SES and TNA as shown in the table below. The PESO will provide the conduct of Pre-Employment Orientation Seminar (PEOS) to unemployed household members.

Table 32. Identified Current Skills of PAFs

Category	Current Skills	Number of PAFs							
		Household Head				Household Member			
		Male	Female	Total	%	Male	Female	Total	%

No Data				15	25.42				
TOTAL		**28**	**16**	**59**	**100**	**10**	**27**	**37**	**100**

Likewise, DPWH and PESO will also prioritize the employment of PAFs in the construction projects situated in the city and neighboring cities.

8.14.5. Entrepreneurial Skills Training with Starter Kit

The DTI, TESDA, and PESO will provide specific Entrepreneurial Skills Training Courses for PAFs. Once they are transferred to the resettlement site, the DTI will commence supporting PAFs by giving enterprise training Levels 1 and 2. Every PAP can apply for

training on how to start a micro-enterprise. He/She can then continue to further develop their knowledge and skills in sustaining a micro-enterprise. Solo female-headed households and elderly will be included in this training program organized and funded by DTI. The table below shows the Skills Training Courses offered by DTI.

Number of PAFs	Skills Training Courses Offered	Duration	Remark
Open to all (or for those who are willing to attend)	Level 1 – Enterprise	1 day	A two-day training may be implemented by combining the two levels.
	Level 2 – Sustaining the Enterprise	1 day	

After the provision of DTI's Skills Training to PAFs, TESDA and PESO shall provide another specific skills training as identified by the enterprise-based and entrepreneurial-minded PAFs. Values Formation, Inclusive Development, and Gender Sensitivity topics are recommended to be included in the training courses. The table in 8.13.6 shows the Entrepreneurial Skills Training/Courses for PAFs to choose and take.

8.14.6. Entrepreneurial Skills Training Courses

Categories	Skills Training Courses	Categories	Skills Training Courses
Food-Related Courses	Peanut Butter and Jams Making	Chemical-based Products	Laundry Detergent Making
	Fruit Juices and Concentrates Fresh Noodles		Personal Care Products
	No Bake Cakes		Herbal and Transparent Soap Making
	Fish Processing		Specialty and Decorative Soap Making
	Basic Meat Processing		Perfume and Cologne Making
	Ice Cream Making		Scented and Decorative Candle Making
	Shawarma Making		Basic Flower Arrangement
	Native Malunggay Pandesal Making		Wedding Flower Arrangement
	Milk Tea & Fresh Shake Making	Community Development Services	Haircutting for Men and Women
Garments	Basic Tailoring		Hairstyling and Makeup
	Basic Pattern Making		Hilot (Wellness Massage)
	Basic Dressmaking		Massage and Spa

With the CLRDP's assistance, the training cost per individual in this Project will be up to Php 15,000. Training cost covers training fees, allowance, and starter kits (amounting to Php 5,000 worth of tools/utensils). Starter kits will be in the form of tools, supplies, and other livelihood materials, which will be used to start their livelihood activities. The PAFs would be receiving such starter kits right after completion of their training.

Seven (7) single female-headed households and 26 senior citizen-headed households will be included in this program, particularly those who have expressed interest to have or re-establish their livelihood in the resettlement site. PAFs who are of legal age and without a

current job or business, but are willing to start his/her own business, and have passed the DTI's Entrepreneurial Test can be included in this training program.

Based on the TNA and FGD results, the PAFs expressed their desire to start a business right after training. They also wanted to have a start-up capital or a soft loan that could be provided either by the government, a corporate foundation, or an NGO.

8.14.7. Assistance to Secure Soft Loans from the Government

There are 6 types of soft loans, ranging from Php 5,000 to Php 200,000, which the PAFs can apply for livelihood purposes. These loans are provided by the following agencies: DTI, DSWD, DOLE, Department of Agriculture (DA), and Pagtutulungan sa Kinabukasan: Ikaw, Bangko, Industriya, at Gobyerno (Pag-IBIG) Fund. The loan programs available are summarized in the table on the next page.

Table 33. Loan Assistance

Programs	Description	Agency
Pondo sa Pagbabago at Pag-asenso (P3)	• A micro-enterprise borrower may avail Php 5,000 up to Php 200,000, depending on the size of the business and the enterprise's ability to pay. • For enterprises with at least one employee, beneficiaries can borrow up to Php 200,000. • The fund should be used for the enterprise's expansion and/or additional supplies of the business or for self-rehabilitation. • This program provides affordable and cost-efficient micro-loans with 2.5% monthly interest.	DTI
Livelihood Seeding Program	Php 5,000 worth of goods for sari-sari store, rice store, rug making, etc. will be provided.	
Livelihood Program	Provision of: • Skills training – Php 15,000 • Seed Capital Fund – Php 15,000	DSWD
Balik Probinsya, Bagong Pag-asa Program (BP2)	For low-income families who will opt to move out of poor urban communities and return to or relocate to other provinces due to but not limited to: (i) the family decided to go back to the provinces, (ii) loss of job or other source of income, (iii) unsafe dwelling places, or (iv) exposure to health and safety risks and other environmental hazards, there will be provision of: • Transportation Assistance/Relocation Assistance – Php 3,000 – Php 35,000 • Transitory Family Support Package – Php 10,000 – Php 70,000 • Livelihood Settlement Grants – shall not exceed Php 50,000 • Transitory Shelter Assistance – 1- to 2-year house rental (estimated to be Php 120,000 – Php 250,000)	

DOLE Integrated Livelihood Program (DILP) or Kabuhayan Program	• Unemployed, poor, seasonal, and low-waged workers can start individual livelihood or collective enterprise undertakings. • Individual project shall have a maximum project cost of Php 10,000, depending on the project requirement.	DOLE
Loan Assistance to Marginalized Small Farmers and Fisherfolk	Php 25,000 per household will be provided.	DA
Multi-Purpose Loan Program (MPL)	Qualified members can borrow up to 80% of their total Pag-IBIG Regular Savings.	Pag-IBIG

The DPWH and the City of Malabon will advise PAFs on available loans and assist them to prepare applications with a supporting letter from the LGU. The PAFs may apply for such loans upon completion of entrepreneurial training or when they have a feasible business plan.

In addition, the CSWDD, together with the Office of the Senior Citizens' Affairs (OSCA), could also assist the single female-headed households and the elderly to access loans and other related services for livelihood restoration, or even for alternative livelihood for affected individuals.

8.14.8. Community-Managed Multi-Purpose Services Cooperative Formation and Developments

Under the CLRDP, the participation of community members is prioritized. In identifying common issues and concerns, community members may be encouraged to plan and decide to have their own business and manage it by themselves. Such livelihood efforts would need support from the government.

Government agencies like the Cooperative Development Authority (CDA), DTI, DOLE, and PESO can work together to assist PAFs in forming a CBO for livelihood restoration and development endeavors. These government agencies could also guide and capacitate the CBO towards community empowerment and sustainable livelihood development programs. At least 20 PAFs from the resettlement site will need to be organized to start the organization.

In setting up a multi-purpose services under the management of CBO, the concerned line government agencies could guide the organized PAFs to identify which type of services they need to focus on, like manpower, transportation, production, construction, or a combination of services. The table below shows specific activities, learning sessions, and topics that can be offered.

Activities and Learning Sessions	Topics
Pre-Membership Seminar	• Cooperative Introduction, Purpose, and Principles • Organizing a Primary Cooperative • Membership, Organizational Structure, and Administration • Responsibilities, Rights, and Privileges • Capital, Property, and Funds

	• Allocation and Distribution of Net Surplus • Reports required • The Business Entity
Constitution and By-Laws Formulation	• Articles of Cooperation • Certificate of Registration • Types of Membership • Organizational Structure • Voting System • Set of Officers
Registration with Relevant Government Agency	Required documents for submission to the concerned agency.
Three-Year Strategic Planning Workshop	• Strengths, Weaknesses, Opportunities, and Threats (SWOT) Analysis • Vision, Mission, and Goals (VMG) Setting • Strategic Direction Formulation, Objective, and Output Development
Year 1 Action Planning	• Annual Objective • Output Indicators • Major Activities • Timelines • Responsible Committee/Person • Resource Requirements • Budget
Human Resources and Outsourcing Services Planning Workshop	• Importance of Human Resource Outsourcing • Pros and Cons • People-Managed Human Resource Outsourcing Services • Plan of Action
Organizational Development Training and Planning Workshop	• Governance • Human Resources • 7S Framework • SWOT Analysis • Plan of Action
Operations, Financial, and Marketing Management Training/Workshop	• Basic Management Functions • Principles and Practices • Management and Stewardship

8.14.9. Access to Seed Capital

A resettlement site will be allotted the amount of Php 1,500,000.00 as seed capital for the implementation of an identified business of the organized PAFs or registered CBO. To access the Seed Capital Assistance, the LIAC/CRIC Sub-Committee on Livelihood Restoration and Development (SCLRD) will first need to craft a mechanism to guide the organized PAFs or registered CBO to ensure sustainable livelihood development undertakings. Trained CBO officials will develop a Project Proposal to be submitted to the LGU/LIAC/CRIC SCLRD. The proposal will then be submitted to the Local Chief Executive

(LCE) for review, endorsement, and approval. The organizations are to be managed by the community.

8.14.10. Building Partnership and Marketing Endeavors

The employment of various ways and means to partner with the government, NGOs, the private sector, and other civil society groups could be done, depending on the appropriate acceptance of the prospect entity. This could become an avenue to offer its services to the demand side of the labor market. The PESO, DTI, and DOLE should assist the organized group/s in connecting with the private sector and civil society groups.

8.15. Implementation Arrangements

Under this plan, the UPMO, with the support of ESSD, and the implementing consultants will manage the implementation of the livelihood programs with a strong and close coordination among national government agencies and LGUs. The table below summarizes the roles and responsibilities of the various agencies involved in the CLRDP implementation.

Table 34. Summary of Roles and Responsibilities of Concerned Government Entities

Agency	Roles and Arrangements
DPWH UPMO-FCMC and ESSD	• Establish masterlist of eligible PAFs for LRIP • Coordinate with KSA, government line agencies, and concerned LGU in monitoring the implementation of CLRDP • Prepare and submit the Resettlement and CLRDP Monitoring Reports to the WB
CDA	• Assist in forming cooperatives at relocation sites • Assist in providing capacity-building activities
DTI	• Provide Financial Literacy Seminar and Entrepreneurial Assessment, as well as Entrepreneurial Skills Training to PAFs • Provide business starter kits through the Livelihood Seeding Program • Provide soft loans to individual entrepreneurs and organized groups of entrepreneurs
DOLE	• Assist in providing employment support to PAFs/relocatees • Assist in providing start-up kits for workers and entrepreneurs
KSA (NHA)	Monitor the livelihood restoration activities in the relocation site together with the focal person from LIAC SCLRD
City of Malabon	• Assist in addressing what to expect at the resettlement area • Present the labor force needed by industries and other establishments • Provide awareness-raising on behavior, values, and culture in resettlement area (due to negative feedback from receiving LGUs)
PESO	• Maintain a database of trained PAFs for its job matching and referral purposes • Assist the trained PAFs in processing their job application and hiring requirements • Encourage private companies and government entities to hire the qualified vulnerable groups as part of its commitment to support disadvantaged individuals

	• Encourage employers to submit a list of job vacancies to its office for the possible employment of the vulnerable sector • Ensure that PAPs applying for jobs for the first time will not pay fees for government documents required for employment (RA 11261) • Support the employment of PAFs abroad, if they are qualified
CSWDD	Assist in providing livelihood support to female-headed households, the elderly, and PWDs
LIAC SCLRD	• Responsible for the implementation, monitoring, and evaluation of all livelihood restoration activities at the relocation site • Reports directly to the City Mayor as head of LIAC • Provide focal person for coordination • Ensure database of trained PAFs

The estimated number of CLRDP participants was taken from the results of the TNA and the verification of the masterlist of qualified PAFs. As for the 106 PAFs to be assisted, the estimated budget is **Php 15,000,000.00**, which comprises vocational training with starter kit including daily allowance, start-up capital, or additional capital to beneficiaries with existing or have previous business and are willing to restore, and for first timers, employment assistance to the household members, and the seed capital for organized PAFs/CBOs.

In the event that the budget for livelihood restoration and development will not be sufficient to accommodate all eligible PAFs, the DPWH will provide for the additional budget requirement. The UPMO-FCMC, with the assistance of the implementing Consultants of the MMFMP1, will carry out the livelihood development programs in coordination with the City of Malabon based on the MOA for the project management. Funds to support the identified livelihood programs including investments in the training and LGU requested livelihood and social infrastructures will be downloaded to the LGU. The table below shows the estimated CLRDP budget in the resettlement site.

Table 35. LRIP Budget

Particulars	Unit Cost (PhP)	Frequency	No. of PAFs	Total (Php)
For Individual Assistance				
Skills Training				
Vocational Training (approximately 10 days)	8,000.00	1 training	106	848,000.00
Daily Training Allowance	300.00	10 days	106	318,000.00
Starter Kit	5,000.00	1 time	106	530,000.00
Subtotal				1,696,000.00
Start-Up Capital				
Provision of start-up and/or additional capital with previous or no existing business yet and with existing business	15,000.00	1 time	106	1,590,000.00
Employment				

Financial assistance for documentary requirements, testing and application for Philippine Health Insurance Corporation (PhilHealth), Social Security System (SSS), and Pag-IBIG memberships, among others	3,000.00	1 time	106	318,000.00
Allowance for 30 days upon employment	300.00	1 time	106	31,800.00
Subtotal				349,800.00
For Group Assistance				
Seed Capital for Organized PAFs/CBOs	1,500,000.00	1 time	4 groups (10-20 PAFs per registered CBO)	6,000,000.00
Total				**9,635,800.00**[3]

8.16. Monitoring and Evaluation

8.16.1. Composition

To ensure that the purpose of the LRIP is achieved, a system and procedure is being formulated for the periodic monitoring and assessment of the implementation of LRIP. At the DPWH level, the results of the monitoring and evaluation activities shall serve as one of the bases of the agency for the enhancement of its policies, processes, and strategies in implementing livelihood assistance to PAFs and vulnerable individuals.

At the LGU level, the LIAC SCLRD will be the overall site monitoring in the implementation of the CLRDP. The LIAC SCLRD is composed of representatives from CSWDD, PESO, TESDA, other key line entities, and CSO members. The LIAC SCLRD will report directly to the City Mayor as the chairperson of LIAC.

8.16.2. Monitoring and Evaluation System and Procedure

- The UPMO shall take the lead in monitoring the CLRDP implementation;
- The UPMO shall formulate a detailed monitoring and evaluation system according to its distinctive needs and concerns. They shall define what to monitor, how monitoring will be undertaken, the regularity of monitoring, and who will be involved or responsible.
- A full-time internal monitoring staff from the UPMO-FCMC with the field coordinator designated by an LGU shall monitor and document monthly progress reports and shall report directly to the LIAC SCLRD.
- The UPMO and NHA shall check the monthly monitoring received from the field coordinator.

[3] The Php 15,000,000 CLRDP budget per LGU is divided for 2 RAPs of Batch 3 Pumping Stations in Malabon City. For this RAP, Php 9,635,800.00 is allocated while the remaining amount will be for the RAP specific for the Magsaysay Pumping Station in Brgy. San Agustin.

- The UPMO and NHA shall provide Quarterly Progress Reports and updates to the DPWH.

IX. GRIEVANCE REDRESSAL

The DPWH will utilize its existing feedback handling mechanism system namely (i) Feedback Handling, a system that receives, sorts, and resolves feedbacks on DPWH projects and (2) Civil society organization (CSO) accreditation to serve as partners and or observers in all stages of project development cycle (planning, implementation, operations and monitoring and evaluation) and other areas of mutual interest. The Feedback Handling Component is managed by the Stakeholders Relations Service (SRS) unit headed by a division head and staffed by six action officers manning the system during office hours. As it is a 24-hour service, one action officer is designated each night. The SRS has two hotlines, a text messaging system (2920), an email account and social media accounts (Facebook and Twitter). It also accommodates walk-in complainants in its office. Feedbacks/complaints are farmed out by Action Officers to concerned units/divisions in the agency and actions are monitored by platform officers (one officer per platform, i.e. email, Facebook, etc.). Serious complaints (i.e. allegation of fraud and corruption) are usually forwarded to high ranking officials (undersecretary level). Service standards and responsible staff are also shown in SRS Chart below in Figure 15.

STAKEHOLDERS AFFAIRS DIVISION - STAKEHOLDERS RELATIONS SERVICE (SAD - SRS)
FEEDBACK MANAGEMENT CENTER: HANDLING OF FEEDBACKS

Schedule of Availability of Service:
-Mondays to Fridays, 8:00 am to 5:00 pm (without noon break) for walk-in and phone-in transactions;
- 24 / 7 for feedbacks coursed through 165-02 call center, e-mail, SMS (Text2920) and social media (Facebook / Twitter)
Who May Avail of the Service: General Public
What are the Requirements: Contact details, mailing address and/or supporting documents, if needed
Duration: 5 minutes to 15 days, depending on the urgency and action required for the feedback

How to Avail of the Service:

Step	Applicant/Client	Service Provider	Duration of Activity	Person in Charge	Fees	Form
1	Course feedback/ inquiries / request or commendation through any of the following modes: a. Visit Stakeholders Affairs Division - Stakeholders Relations Service, Head Office to address the feedback personally or leave your comments using the Customers' Feedback Form located at the Front Desk of all DPWH Offices. b. Send an email to dpwh_feedback@yahoo.com c. 165-02 Call Center Hotline or SRS Hotline numbers 02-3043370/ 02-3369196; d. Post at DPWH official social media accounts: Department of Public Works and Highways, Philippines Facebook Page and @DPWHph on Twitter. e. Text DPWH (space) message at 2920	Stakeholders Affairs Division (SAD) will gather feedback and contact details of customer and create new transaction on the database.	*Walk-in - 10 minutes Email - 1 day Phone-in - 5 minutes Social Media - 1 day TEXT 2920 - 1 day	Action Officer of the Day	P 2.50 for 160-character message sent to 2920	Customers Feedback Form, Walk-in Form
		Provide reply to simple feedbacks.				
		For complex queries or concerns, customer's feedback will be properly referred to appropriate DPWH office for proper response and action, if necessary.	1 day			
2	Wait for action within 1 -15 working days for complex transactions subject to the request for extension of time w/c the concerned DPWH office may seek action	Preparation and signing of Request for Action (RFA) Memorandum and endorsement to concerned DPWH offices	1 hour		none	none
		Evaluation of feedback, investigation, preparation of reply and transmittal to Stakeholders Relations Service	1-15 days for those requiring further 1 day for urgent matters	Concerned Regional / Service / Bureau Director		
		Relaying feedback to Customer	1 hour	Action Officer		
END OF TRANSACTION						

Figure 15 Stakeholders Relations Service and Handling of Feedback

The GRM will ensure that consultation and disclosure, as well as monitoring and evaluation, is undertaken in accordance with the RAP. In order to accommodate grievances and unintended impacts, constant communication and consultation with the affected people will be institutionalized.

To improve the current system, SRS will establish a Public Complaints Unit (PCU) within the UPMO; and set up a local help desk within the LGU and Barangay/s under the LIAC to address and resolve any project-related grievances from PAPs or other stakeholders and members of the public. It will be managed with the support of the social and environmental team in the UPMO. The Project will also engage the services of non-project-related advisers to serve on a panel to help resolve difficult grievances. The panel members will be recognized by the public for their impartiality, community service, and good judgment. This group could include individuals from PCUP, retired jurists, clerics or religious officials, or people representing or doing community service in support of the urban poor. As a matter of policy, the Project will not prevent any party from seeking legal remedies from any government judicial body.

The MMFMP1 GRM will be implemented based on the following principles:

- Simplicity – Procedures in filing complaints are understandable to users and easy to recall.

- Accessibility – Filing complaints is easy through means that are commonly used by stakeholders, especially by the PAPs.
- Transparency – Information about the system is made widely available to all stakeholders and the general public.
- Timeliness – Grievances are attended to and resolved in a timely manner.
- Fairness – Feedback or complaints are validated thoroughly and subjects of complaints are given due process and opportunities for appeal.
- Confidentiality – The identity of complainants remains confidential.

To achieve these principles, the Grievance Redress Service (GRS) will be set up with the following features:

- Multiple uptake points – In addition to access through the Community Contact, complainants will be provided with multiple channels to submit their complaints. These include postal mail, electronic messages, telephone, short message service (SMS), and personal delivery/walk-in. A project GRS hotline will be established to be managed by the GRS focal person at the UPMO.
- Local help desk within the LGU under the LIAC – The help desk will be provided by LGU with office space, desk, chair, and telephone. It will be available from Monday to Friday, 8:00 A.M. to 5:00 P.M. The PCU focal person will record the complaint and forward it to the concerned offices depending on the type of grievances.
- Timely resolution at the lowest possible level – The Project will strive to attend to complaints in a timely manner. To do this, it will designate a Community Contact at the sub-project level. In addressing and resolving complaints, the Project will build on existing mechanisms in the community (community leaders, barangay officials, barangay justice system, etc.). It is only when the complaint is not resolved at this level that the complaint goes to the UPMO GRS for resolution.
- System for receiving, sorting, verifying, and tracking – A simple system will be developed to facilitate effective management of complaints to guide the UPMO, particularly the PCU, on the steps and arrangements from receiving, sorting, verifying, acting, and tracking complaints. These will be detailed out in the operational manual. Complaints will be categorized and actions on the complaints will be implemented and documented. The Project will maintain a database documenting the salient details of complaints, including the dates they were received and when and what actions were taken. These documents will be available to the external monitoring team and the WB disclosure and ease of access; the salient features of the GRS will be publicly disclosed so that people are aware of where and how complaints will be managed. The Community Contact person assigned to the sub-project will further ensure that people in the sub-project's area of influence are aware of grievance management arrangements. Ideally, complaints should be written, but if received verbally, the Community Contact person will ensure written documentation is made and that the complaint is dated and recorded.

The following are the types of grievances that the Project foresees and the responsible individuals/units for management.

Table 3. Responsibility Matrix for Grievance Management

Type of Grievances	Description	Resolved at Level of	Possible Range of Actions	Responsible
Type A: Queries, comments, suggestions	Inquiries comments or suggestions on RAP implementation	Uptake Points (Community Contact or Project Staff)	Immediate feedback to provide clarification, provision of IEC materials, referral to appropriate individuals or bodies	Community Contact, project staff or SHFC/SHARE, AGOM and NHA, Brgy LGU concerned
Type B: Performance of Obligation	Complaints about non-performance of obligations or non-compliance to agreements such as those contained in the operations manuals, memorandum of agreements/understanding (MOA/U), sub-project agreements, RAP, etc	LGU-HRT, if not resolved elevated to PMO Public Complaints Unit	Emphasize strict adherence to agreements and resettlement standards corrective measures agreed with partner agencies/organization	LGU-HRT, PMO Public Complains Units
Type C" Misconduct of Project Staff and Project Partners/ Contractors Violations of Law	Misconduct of program staff and program partners allegations about corruption, misuse of funds, falsification of public documents	Undersecretary in-charge if subject of complaint is the PMO Head	Finding Committee to validate the complaint, Filing of appropriate charges if there is falsification of public documents, recommend conduct of special audit	Undersecretary in-charge

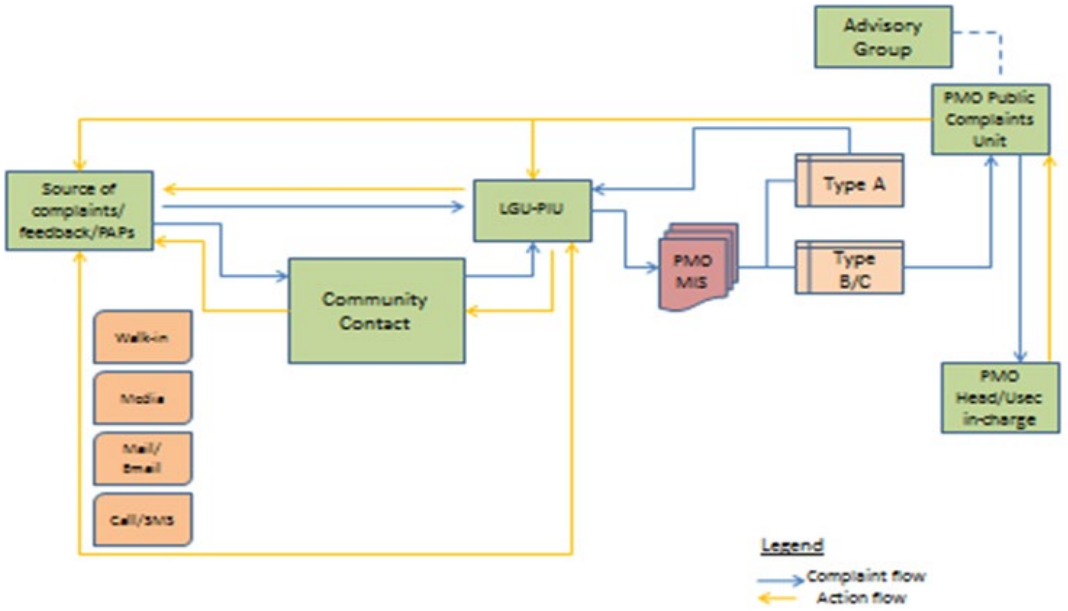

Figure 15. Overall Grievance Management Process Flow

The Project will monitor complaints and coordinate with the concerned LGUs and relevant government agencies as needed to resolve them adequately and expeditiously. The DPWH will keep the WB Task Team informed about any significant complaints and the steps taken to resolve them.

A Grievance Redress System will be established to ensure transparency in the use of funds and that grievances regarding the Project are effectively and expeditiously resolved. This provides the PAFs the opportunity to voice out any complaints and grievances regarding the overall implementation and resettlement process.

According to LARRIPP, grievances related to any aspect of the Project or sub-project will be handled through negotiations and are aimed at achieving consensus, following the procedures outlined below:

- The grievance shall be filed by the PAFs with the LIAC or CRIC who will act within 15 days upon receipt thereof, except complaints and grievances that specifically pertain to the valuation of affected assets, since such will be decided upon by the proper courts;
- If no understanding or amicable settlement can be reached or if PAF does not receive a response from the LIAC or CRIC within 15 days of registry of the complaint, he/she can appeal to the concerned UPMO-FCMC ROW Task Force, which should act on the complaint/grievance within 15 days from the day of its filing; and
- If the PAF is not satisfied with the decision of the UPMO-FCMC ROW Task Force, he/she as a last resort can submit the complaint to any court of law. The PAFs shall be exempted from all administrative and legal fees incurred pursuant to the Grievance Redress Procedures.

All the complaints received in writing (or written when received verbally) from the PAFs will be documented and shall be acted upon immediately according to the procedures detailed above.

The DO 65 and 203 s. 2017 do not precisely stipulate participation of Regional Offices and District Engineering Office (DEO) into ROW acquisition and grievance procedure. However, since their participation is indispensable for smooth implementation of resettlement, coordination between UPMO-FCMC and the National Capital Region, and/or concerned DEO may be also essential for this Project.

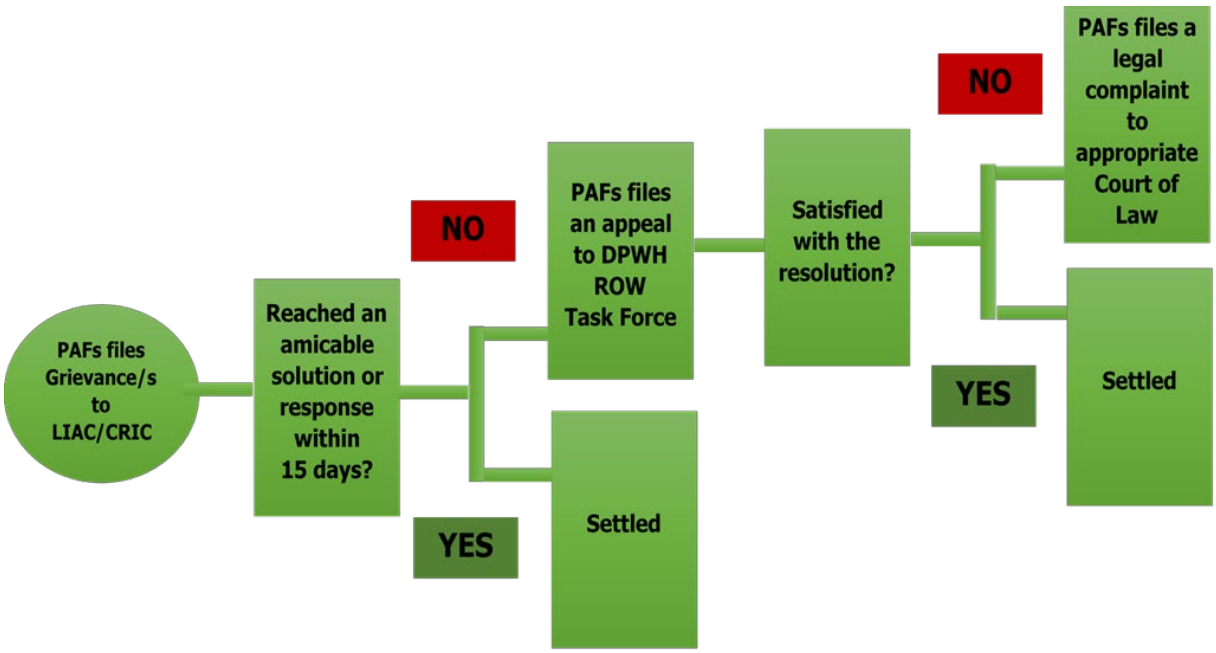

Figure 16. Grievance Redressal Process at the Sub-Project Level

9.1. GRM Procedures

Grievances from PAPs related to the resettlement implementation or other project-related issues will be handled free of monetary charge through a process of negotiations aimed at reaching a consensus.

9.2. Grievance Communication Between Grievance Redressal Officer and PAPs

The Local/Central GRM Team will keep informing PAPs on the status of their complaint and its resolution. Responses to any grievance submitted as anonymous are posted on the public information board when possible. The process for addressing anonymous grievances will be posted on bulletin boards.

9.3. Monitoring Reports on Grievance Redress

The UPMO monitors the grievance redress status monthly and reports the results to the Board on a quarterly basis by submitting Monitoring Reports on Grievance Redress pertaining to accomplishments and status of unresolved grievances. These reports form a part of the Internal Monitoring Report.

9.4. Monitoring Approaches

Monitoring activities to generate data on the GRM's relevance, effectiveness, and efficiency will range from simple tracking of the progress of cases using a centralized database management and tracking system. The results of local monitoring will be documented by Grievance Redressal Officers and also uploaded on the centralized database management and tracking system under the monitoring tab that contains a specific monitoring template.

9.5. Reporting

The results of monitoring activities will be documented by local grievance redressal officers and submitted to GRM managers and the Central GRM Team once a month.

A monitoring report includes the following: (i) the progress of addressing grievances, (ii) raised issues and concerns, (iii) comments for improving the GRM, and (iv) the inclusion of monitoring sheets (e.g., the number of grievances received and resolved, and the categories of complaints received).

9.6. Continuous Update of the GRM

The GRM policies and procedures will be updated every six months to streamline the process where needed. Discussions and revisions will be made by the Central GRM Team based on recommendations. If necessary, interviews will be conducted directly with local officers on the site.

X. MONITORING MECHANISM

The purpose of monitoring and evaluation for the implementation of RAP is to ensure that all resettlement arrangements and the measures for avoiding, minimizing, or compensating losses or other negative social impacts resulting from resettlement are implemented properly, based with the plan.

The RAP implementation will be monitored both internally and externally. Selected members of the LIAC will form part of the internal monitoring team. An external monitoring will include representatives from DPWH and Commission on Audit (COA) or an independent consultant. The DPWH will have a Resettlement Specialist (RS) to provide necessary technical assistance, monitor RAP implementation, and report on a quarterly/monthly basis to LIAC on the progress of resettlement activities.

The DPWH will be responsible for managing and maintaining affected people databases, documenting results of affected people census, and verifying asset and SES data, which will be used as the baseline for assessing RAP implementation impacts. The LIAC will submit reports on resettlement progress to DPWH for review.

Details on internal and external monitoring are presented in Tables 40 and 41. Indicators were established to ensure the attainment of RAP's objectives. The various indicators and benchmarks will be monitored by means of two monitoring mechanisms:

- Internal monitoring of process and output indicators; and
- External monitoring by an independent monitoring agency, e.g., COA or an independent consultant/s to check the extent to which resettlement and rehabilitation objectives have been met.

RAP implementation will be monitored both internally and externally. DPWH will have an RS to provide necessary technical assistance, monitor RP implementation and report on a quarterly/monthly basis on the progress of resettlement activities.

10.1. Objectives

The main objectives of the monitoring are: (i) to verify whether resettlement was effectively implemented in a timely manner, (ii) to evaluate whether resettlement was implemented as planned in RAP, and (iii) to see if livelihoods and standards of living are improved or at least restored.

10.2. Scope

RAP to be prepared, implemented, and monitored shall cover all the items mentioned in the RAP outline, including but not limited to the identification and entitlements of the affected PAFs and income/livelihood restoration.

10.3. Monitoring Mechanism

10.3.1. Internal Monitoring

The ESSD under DO 58 of the DPWH shall conduct the supervision and in-house monitoring of implementation of the RAP and will be alternately called the Internal Monitoring Agent (IMA).

The objectives of Internal Monitoring are:

- To check whether resettlement is implemented as planned in RAP; and
- To review unforeseeable issues during the RAP preparation.

The principal items to be monitored by Internal Monitoring are enumerated below:

- Verify that the re-inventory, baseline information of all PAPs/PAFs has been carried out and that the valuation of assets lost or damaged, the provision of compensation, and other entitlements and relocation, if any, has been carried out in accordance with the LARRIPP and the respective RAP reports;
- Ensure that resettlement is implemented as designed and planned;
- Verify that funds for implementing the RAP are provided by the UPMO in a timely manner and in amounts sufficient for the purpose;
- Timely and complete disbursement of compensation amount to each PAPs/PAFs, if any, in accordance with agreed conditions during negotiation; and
- Record all grievances and their solution, and ensure that complaints are properly dealt with.

10.3.2. External Monitoring and Evaluation

The main objective of External Monitoring is to provide an independent periodic review and assessment of:

- Achievement of the objectives;
- Restoration of the economic and social base of PAPs/PAFs;
- Effectiveness and sustainability of entitlements; and
- The needs of further mitigation measures.

External Monitoring is undertaken by External Monitoring Agency (EMA) engaged by UPMO-FCMC. These objectives will be received through the following activities:

- Verify results of Internal Monitoring;
- Verify and assess the results of the information campaign for PAPs/PAFs rights and entitlements;
- Verify that the compensation process has been carried out with procedures communicated with the PAPs/PAFs during the consultations;
- Assess whether resettlement objectives have been met, specifically, whether livelihood and living standards have been restored and enhanced;
- Assess efficiency, effectiveness, impacts, and sustainability of resettlement implementation, drawing lessons as a guide to future resettlement and policy making and planning;
- Ascertain whether the resettlement entitlement is appropriate to meet the objectives and whether the objectives were suited to PAPs/PAFs conditions;
- Suggest modification in the implementation procedures of the RAP, if necessary, to achieve the principles of the RPF;
- Review on how compensation rates were evaluated; and
- Review on handling of complaints and/or grievance cases, if any.

10.4. Stages and Frequency of Monitoring

The stages and monitoring frequency of the contract packages by the IMA and EMA are as follows:

10.4.1. Compliance Monitoring

This is the first activity that both IMA and EMA shall undertake to determine whether or not the RAP was carried out as planned and according to WB Guidelines and the LARRIPP.

The EMA will submit an Inception Report and Compliance Monitoring Report one (1) month after receipt of Notice to Proceed for the engagement. The engagement of the EMA shall be scheduled to meet the Policy's requirement of concluding RAP implementation activities at least one (1) month prior to start of the civil works.

10.4.2. Frequency of Internal and External Monitoring

Internal Monitoring will be implemented monthly from resettlement commencement until its completion. External Monitoring will be implemented monthly from commencement of resettlement up to completion of construction works.

10.4.3. Final Evaluation

Final evaluation of the implementation of RAP will be conducted by IMA and EMA three (3) months after the completion of payments of compensation to PAPs/PAFs and resettlement.

10.4.4. Post-Evaluation

This activity will be conducted by DPWH a year after the completion of the construction works to determine whether the social and economic conditions of the PAPs/PAFs after the implementation of the Project has improved.

10.5. Reporting

10.5.1. Internal Monitoring Report

The ESSD prepares the Internal Monitoring Report at each monitoring period, including:

- Progress of compensation/entitlement payment, and relocation/resettlement; and
- Raised grievance/s and solutions recommended or extended.

10.5.2. External Monitoring Report

The Report to be prepared at each monitoring period summarizes the findings including:

- Progress of implementing RAP, including any deviations from the provisions of the plan;
- Level of livelihood restoration;
- Identification of problems, raised grievances, and recommended solutions; and
- Report on progress of the follow-up of issues and problems identified in the previous monitoring reports.

10.6. Monitoring Indicators

This outlines the basic monitoring indicators for IMA and EMA as shown in the table below.

Table 37. Basic Monitoring Indicators for IMA and EMA

Monitoring Indicators	Context of Internal Monitoring	Context of External Monitoring
Quality of Implementation Implementation of the Entitlements and Project Assistance indicated in the RAP	• All PAPs/PAFs have received entitlements accordingly as set out in the Entitlement Matrix. • All agreed transport costs, relocation costs, income rehabilitation support, and any resettlement allowances have been received according to schedule. • Number of PAFs who have received housing as per relocation options in the RAP. • House quality meets the standard agreed. • Resettlement sites have been selected and developed as per agreed standards. • Occupation of PAPs/PAFs in the new houses. • Assistance measures were implemented as planned for host communities. • Livelihood restoration procedures were made for social infrastructure and services. • PAPs/PAFs were able to access schools, health services, cultural sites, and activities as the level of accessibility prior to resettlement. • Income and livelihood restoration activities were being implemented as set out in the Income Restoration Plan. For example, the number of PAFs trained and provided with jobs, and number of income generating activities. Affected businesses have received entitlements, including transfer and payments for losses resulting from lost businesses and stoppage of production, if any	• Verification on the report of timeliness of issuance of project assistance based on the entitlement matrix including changes in the patterns of occupation, production, and resources used as compared to the pre-project situation have occurred. • PAPs/PAFs have adopted the housing options developed. • Changes in the income and expenditure patterns compared to pre-project situations have occurred. • Changes in cost of living compared to pre-project situations have occurred. PAFs incomes were able to keep pace with these changes. • Changes have taken place in key social and cultural parameters relating to living standards changes have occurred for vulnerable groups. • Perceptions of community have been restored. PAPs/PAFs have achieved replacement of key social/cultural elements. • Transfer and relocation payment covered these costs. • Income substitution allowed re-establishment of enterprises and production. • Enterprises affected have received sufficient assistance to re-establish themselves. • Vulnerable groups have been encouraged, provided with effective and sustainable income-earning opportunities. • Jobs are provided, enabling the restoration of pre-project income levels and living standards.

Monitoring Indicators	Context of Internal Monitoring	Context of External Monitoring
Information, Consultation and GRM	• Consultations have taken place as scheduled, including meetings, group discussions, and community activities. Appropriate resettlement leaflets have been prepared and distributed. • Number of PAPs/PAFs that know their entitlements and number of PAPs/PAFs that were able to receive. • Number of PAPs/PAFs that were able to use Grievance Redress Procedures and their outcomes. • Conflicts have been resolved. • The Social Preparation Phase has been implemented.	• Verification on the information and knowledge of PAPs/PAFs in resettlement procedures and their entitlements • Knowledge if these have been met • Knowledge of PAPs/PAFs in the extent of restoration of their own living standards and livelihood • Knowledge of PAPs/PAFs about grievance procedures and conflict resolution procedures, and satisfaction to those who have used the said mechanisms
Efficiency of RAP Implementation	• All resettlement staff have been appointed and mobilized for the field and the office work on schedule. • Capacity-building and training activities have been completed on schedule. • Resettlement implementation activities were achieved according to the agreed Implementation Plan. • Funds for the resettlement are allocated to the resettlement agencies on time. • Resettlement offices have received the scheduled funds. • Funds have been disbursed according to the RAP. • The Social Preparation Phase took place as scheduled.	• Verification of the actual versus planned number of staff social safeguards staff hired to implement the RAP. • Type and number of capacity building activities conducted. • Established regular and timely submission of monthly progress reports on the RAP Implementation • Correctives measures prepared if any • Timeliness of budget release for RAP implementation • Timely disbursement of funds for PAFs • Manner and timeliness Social Preparation Activities
Level of Effectiveness in the Implementation of the RAP	• Location • Composition and structures, age, education, and skills levels • Gender of household head • Ethnic/Minority group, if any • Access to health, education, utilities and other social services • Housing types • Land use and other resourced ownership patterns • Occupation and employment patterns • Income sources and levels • Participation in neighborhood or community groups • Access to cultural sites and events • Value of all assets forming entitlements and resettlement entitlements	• PAPs/PAFs were correctly enumerated/identified. • Resettlement speculators were identified. • Time frame and budget were sufficient to meet objectives. • Entitlements were too generous. • Vulnerable groups were identified and assisted.

10.7. Monitoring Structure

UPMO-FCMC compiles Internal Monitoring Reports and External Monitoring Reports into one (1) Monitoring Report and shall submit it to the WB quarterly as a part of Quarterly Progress Report. Figure 18 shows the Procedure of Monitoring and Reporting.

Figure 17. Procedure of Monitoring and Reporting

XI. PUBLIC INFORMATION, CONSULTATION, AND PARTICIPATION

The conduct of Public Consultation with PAPs is to solicit their view on the current impact of the Project to the PAPs, the proposed resettlement, and its impact socially and economically. Further, this is to disclose the amended RA 10752, or otherwise known as "The ROW Act," and its 2016 amended Implementing Rules and Regulation (IRR) and other relevant international, national, and local laws to serve as legal basis for resettlement efforts and establish parameters for entitlements of displaced families.

Stakeholders' active participation and commitment is highly needed in the whole process of consultation. All identified issues and concerns will be documented with the attached attendance sheet, minutes of the meeting, and photos.

This will ensure that issues, concerns, and voices of affected persons are incorporated in the project preparation. Meetings with concerned LGUs will be carried out to disclose initial information about the Project prior to the RAP-related activities. Future consultations will also be undertaken to present the legal/policy framework and during project implementation.

11.1. Information, Education, and Communication (IEC)/Project Presentation Materials and Meetings

IEC meetings and project presentation materials are prepared in both English and Tagalog. These materials are used to allow the PAPs to understand the Project that will create an avenue for them to participate and cooperate in the surveys.

Table 38. List of IEC Meetings with LGU and other Concerned Government Agencies

Date	Participants	Methods	Number of Participants		
			Male	Female	Total
April 22, 2021	LGU Malabon, DPWH, DOHWA	Online (via Zoom Meeting)	11	5	16
January 24, 2023	NHA North Sector Office, DPWH, DOHWA	Face-to-Face	3	5	8

Hereunder are the issues and concerns raised during the IEC meeting:

Issues and Concerns Raised	Response
Implementation Schedule	The implementation schedule and the three (3) priority areas (Acacia, Magsaysay, and Merville) under Batch 3 Pumping Stations will commence by November 2021 for procurement activities, then the rest will follow based on the discussion with the Consultant.
Clarification on the Details of Pumping Stations (e.g., Preliminary Plan, Pumping Station Capacity, and Funding of the Project)	The DEOs of DPWH improved/upgraded the area. The Consultant will then continue on the preparation of feasibility study for Batch 3 Pumping Stations. From the result of the feasibility study, comparison will be made on what areas or pumping stations are already in place. If ever there will be an additional capacity needed, that area/s will then be implemented. All pumping stations will be reconstructed, and other pumping stations will just undergo improvement/upgrading. The preparation/conduct of feasibility study is needed for the determination of the capacity of each pumping station and identification of the appropriate work needed on the drainage area. The funding of the Project is as a whole. Focus is on the rehabilitation of pumps and the improvement of the waterways.

Issues and Concerns Raised	Response
Assistance of the LGU Malabon to DPWH	Comprehensive Land Use Plans (CLUP) were already provided. All activities will be closely coordinated with the LGU.
Possible Affected PAFs and Property Owners	There are only 7 pumping stations that have identified PAFs (Niugan, Balot, Merville-Dampalit, Artex, Acacia, Herrera, and Magsaysay) within the technical footprints under the Project. It was clarified that only the pumping stations with identified PAFs will be relocated.
ROW of the Pumping Stations	Discussion of ROW or access road during construction with DPWH and WB due to WB's instruction/advice to focus only on the TFs. The RAP Team will also discuss with the Consultant Technical Team. The Consultant will inform the LGU once the final plans and study is provided. The relocation is limited only to those who are living along the TF.
Information Dissemination to LGU regarding Scope of the Project and Compensation for PAPs	The alignment/TF can only be provided using Google Earth, but will ask from the Technical Team for further information. After IEC meeting, the RAP Team will conduct the SCM and field survey. After the survey, the extent or the impact on structures and/or property of the affected person will be identified.
Access for Hauling of Debris from Pumping Stations	Discussion with the Technical Team for the plans and procedures on how to address the concern will be conducted. The Team will prepare an Environmental and Social Management Plan (ESMP) for the mitigation of negative impacts to the environment.
Coordination with the Barangays for the Conduct of SCM	Coordinate first with the City Engineering Office to advise the affected barangays.

11.2. Establishment of Local Inter-Agency Committees

The establishment of LIAC is in coordination with the LGU through the issuance of an EO. Series of meetings were conducted, discussing issues and concerns before, during, and after relocation of the identified PAFs.

The LIAC is chaired by the LCE and members are composed of the following:

Chairman	-	Representative of Office of the Mayor
Vice-Chairman	-	Representative of DPWH
Members	-	Representative of MMDA

Representative of NHA NCR North Sector Office and/or Malabon/Navotas/Valenzuela (MANAVA) District Office

Representative of DILG

Representative of PCUP

Representative of DHSUD

Representative of CHR

Representative of City Engineering Department

City Planning and Development Department (CPDD)

City Housing and Resettlement Office/Community and Urban Poor Affairs Office (CUPAO)

Representative of People's Organization from the LHB – AIMM (Alyansa nang may Integridad na Maralitang Taga-Malabon)

Representative of City Health Department

Representative of Concerned Punong Barangay

Representative of CSWDD

Representative of Division of City Schools

Representative of City Environmental and Natural Resources Office

Once the LIAC is organized, an MOU between the LGU and DPWH will be followed.

Table 39. List of LIAC Meetings with LGU

Date	Participants	Methods	Number of Participants		
			Male	Female	Total
April 16, 2021	LGU Malabon, NHA MANAVA, DPWH, DOHWA	Online (via Zoom Meeting)	14	7	21
July 14 – 15, 2022	LGU Malabon, NHA MANAVA and North Sector Offices, DILG, DHSUD, PCUP, CHR, DPWH (RRAP Workshop)	Face-to-Face			
May 27, 2023	LGU Malabon, NHA MANAVA and North Sector Offices, DILG,	Face-to-Face	6	8	14

	DHSUD, PCUP, CHR, DPWH (RRAP Workshop)				

Hereunder are the issues and concerns raised during the LIAC meeting:

Issues and Concerns Raised	Response
Inquired if the Project was already discuss with the City Engineering Office	IEC presentation and 1st SCM were conducted on April 22 and June 23, 2021 respectively. The City Engineering Office was invited and attended the activity.
Asked if the proposed Project for the pumping stations together with the ancillary structures were technically discussed with the City Engineering Office, and what was the advantage of the proposed Project against the existing capacity of the pumping stations. Mentioned that DPWH have already identified the affected families, and yet, LGU did not know the exact proposal for the pumping stations.	With regards to the technical description/design of the pumping stations, the Technical Team is still conducting the study. Once the study is finalized, DPWH and DOHWA will coordinate with MMDA and City Engineering Office to discuss the proposal/recommendations to each pumping station.
Inquired if the design of the pumping station is not yet final and how did they identify the affected families and structures.	The identification of affected families and structures were based on the TFs.
Inquired if the LGU can suggest what to be included in the Project but it only limits on the TFs.	DPWH explained that the concept on the identification of PAFs, considered as affected PAFs, is based on the TF only and not on the drainage area. Since the TFs have been established, the Consultant can start with the identification of PAFs. Once the study is finalized, DPWH will coordinate with MMDA and LGU to discuss if the recommendations of the Consultant are feasible.
LGU requested to see the scope of work proposal for the pumping stations to study and provide suggestions, if any, for effective implementation of the Project.	The only involved within the TFs are the PAFs, but the design comprising the whole drainage area is different and needs further study, e.g., if the drainage area needs dredging or river walls.
Inquired if they could identify the affected areas/families by the TFs	The TF uses formulas to pinpoint the affected area, but the main objective is to identify the affected PAFs.
The City Mayor of Malabon quoted the C. Arellano Project of DPWH, which he presumed to have avoided some of the PAFs, pointing out that there was a gap since then, and adding the identified 106 PAFs, which is mostly in Magsaysay Pumping Station. He asked	The Project is for the rehabilitation of identified pumping stations, which includes the relocation of affected PAFs in the implementation. But the relocation of affected PAFs is limited to those within the TF based on the agreement between the Lending Institutions. On the technical side, it does not

Issues and Concerns Raised	Response
for assurance of the Project in helping the city, and the objective of going through the same processes again if nothing is happening, because DPWH has done a lot of projects in the city, but the flood remains the same.	limit on the rehabilitation of pumping stations but also the improvement of drainage area. Explained that the TF focuses only for PAFs, but the improvement of the drainage area could possibly affect those outside of the TF. Once the study is finalized, it will be discussed with MMDA and LGU for comments and suggestions based on the recommendations of the Consultant.
Inquired if Acacia Pumping Station TF is under the elevated highway and how did they identify the PAFs.	The Consultant first identified the TF to know the affected families within that TF who will be subjected to relocation. During the meeting with WB, they were advised that the only affected families to be considered are those within the TF, but the whole drainage area will be considered for improvement and it will be discussed with them once the study is finalized.
Requested that before the Consultant identified the affected PAFs within the TF, the LGU already had a general view of the Project.	The Consultant have separate teams in conducting the study of the pumping stations and the relocation of PAFs.
Inquired if DPWH was aware of the newly rehabilitated Magsaysay and Herrera Pumping Stations led by DPWH DEO.	This is confirmed, because during site validation with the Consultant, they have noted the improvements of the pumping stations that will be considered in the detailed design.
Inquired if Magsaysay and Herrera Pumping Stations will no longer be included in the rehabilitation, and will just focus on the relocation of PAFs.	If the pumping stations still need some improvement, then it will still be included in the rehabilitation. In the study, the Consultant will include the rehabilitation of existing and newly constructed pumping stations. If the capacity is not sufficient to cater the drainage area, then they will still rehabilitate the pumping station.
Inquired if the design of DEO did not pass on the standard (Technical Division) of DPWH Central Office. Inquired on the difference of both designs.	There was no study conducted on the previous rehabilitation, and the reason why there is a need to conduct feasibility study is to know the exact capacity of the pumping station. If the capacity is sufficient for the drainage area, then other improvement is only needed, but if it is insufficient, they will add or upgrade the pumping station.
Requested coordination with the City Engineering Office to discuss the design so they could suggest on the needed capacity of a pumping station, and it was not a waste of time to reassess the pumping stations.	Reiterated that the TF is for the purpose of identifying affected PAFs only, but the identification of areas mostly affected by flooding or that causes flooding will be included in the study/design.

Issues and Concerns Raised	Response
Asked why there is a need to relocate the PAFs.	The PAFs need to be relocated because they are directly attached to the pumping station, and that they need to clear the area for effective rehabilitation of pumping stations. The affected structures/PAFs that need to be relocated are only those within the waterways.
Inquired what is the plan for the PAFs and if this was already coordinated with NHA.	There are two (2) KSAs recommended for the relocation of PAFs: (i) NHA and (ii) Social Housing Finance Corporation (SHFC). Explained that there are options for relocation: (i) the LGU can identify and recommend an area to be developed by DPWH with SHFC or NHA, or (ii) they can coordinate with NHA and SHFC whether in Bulacan or Cavite. However, the first priority is for them to be relocated within the city so the affected PAFs will not be greatly affected in terms of their livelihood or standard of living.
The LGU informed that there are no vacant lots for development and relocation of PAFs. Since 2016, they have not relocated any PAFs.	The DPWH will coordinate with NHA and SHFC. It was also assured that all PAFs will receive assistance (e.g., livelihood, training) in coordination with other government entities.
Asked regarding the time table for the relocation of PAFs.	It would take possibly within a year to relocate the PAFs due to the current situation (COVID-19) and other issues with the receiving LGUs.
Informed the possibility of 106 PAFs to increase in number in due time.	There will be a 2nd Consultation Meeting, and all activities being conducted are coordinated with the barangays. The barangays committed to guard the pumping stations to avoid construction of houses within the area, and there will be issuance of Certificate of No PAFs from barangays with no identified PAFs within the pumping stations. Only those who were identified and included in surveys are affected, which are subject for validation with DPWH, MMDA, NHA, SHFC, and LGU.
Requested that the Local Housing Department to be involved, since the Consultant is coordinating with barangays for smooth coordination.	All activities on ground will be coordinated with LIAC Malabon once established.
Asked if they still need to go through the LHB.	They still need to go to LHB, since the LHB is part of LIAC, which mostly is the spearhead pertaining to resettlement activities, in coordination with the Office of the Mayor and Local Housing Department.

Issues and Concerns Raised	Response
Inquired if there was a deadline on the submission of certificates from the barangays with no PAFs.	There was no certain date of submission, but they followed up the barangays. Barangay staff are trained to conduct census and tagging and SES in view of COVID-19 and their familiarity of the area.
Inquired NHA if it is possible to accommodate the 106 PAFs affected by Batch 3 Pumping Stations on their Housing Project within Malabon City.	NHA said they will look into it once the Project is turned over in the first quarter of 2022. The Contractor committed to construct 12 buildings, with 60 units per building, so it is possible to accommodate the 106 PAFs. As long as the affected PAFs are censused and within the waterways, they are qualified to be relocated on their projects.
Asked for assurance that the 106 PAFs will be accommodated because it was assumed that many families have already lined up for the housing project of NHA.	NHA requested DPWH to provide them with the list of affected families for validation of NHA.
Requested DPWH to provide the detailed time table until 2023.	The implementation schedule will be incorporated in the RAP and will present it to the LGU once finalized. All activities will be coordinated to the Office of the Mayor and LIAC.

11.3. Identification of LGUs/Stakeholders

The Consultant will identify the LGUs/stakeholders affected and will be the target participants of the public consultation. Identification is through the Census and Tagging and SES conducted by the Consultant. The LGUs shall be given a copy of the list for the invitation and vetting.

11.4. Proceeding of Public Consultations

The first round of SCMs is shown in Table 44. The 1st SCM started with the disclosure of the project overview and background, followed by the presentation of RAP activities to be conducted on ground.

Table 40. Summary of Public Consultation Meetings

Date	Participants	Methods	Number of Participants		
			Male	Female	Total
June 23, 2021 (A.M. Session) 1st SCM	DPWH, LGU Malabon, Barangay Officials of San Agustin, Tinajeros and Ibaba, DOHWA	Online (via Zoom Meeting)	8	6	14
June 23, 2021 (P.M. Session)	DPWH, Barangay Officials of Dampalit,	Online	7	9	16

Date	Participants	Methods	Number of Participants		
			Male	Female	Total
1st SCM	Niugan, Panghulo, Concepcion, Baritan, and Tanza II, DOHWA	(via Zoom Meeting)			
December 05, 2022 10:00 A.M. 1st SCM	DPWH, PAPs in Brgy. Maysilo	Face-to-Face	17	30	47
October 7, 2021 2nd SCM	DPWH, PAPs in Brgy. Tinajeros, Niugan, DOHWA	Online (via Zoom Meeting) and Face-to-Face	14	14	28
October 8, 2021 08:00 A.M. 2nd SCM	DPWH, PAPs in Brgy. San Agustin, DOHWA (Batch 1)	Online (via Zoom Meeting) and Face-to-Face	10	27	37
October 8, 2021 10:00 A.M. 2nd SCM	DPWH, PAPs in Brgy. San Agustin, DOHWA (Batch 2)	Online (via Zoom Meeting) and Face-to-Face	9	7	16
October 8, 2021 01:00 P.M. 2nd SCM	DPWH, PAPs in Brgy. San Agustin, DOHWA (Batch 3)	Online (via Zoom Meeting) and Face-to-Face	4	16	20
January 6, 2023 10:00 A.M. 2nd SCM	DPWH, PAPs in Brgy. Maysilo	Face-to-Face	8	15	23
March 30, 2023 10:00 A.M. General Assembly	*DPWH, LGU, NHA, PAFs from Batch 3 and Magsaysay PS	Face-to-Face	63	58	121

Note: *Magsaysay PS was invited upon their request from the LGU to be included.

A summary of the main concerns/issues raised during the 1st SCM is provided in Table 45.

Table 41. Summary of Issues and Concerns During 1st SCM

Issues and Concerns Raised	Response
Inquired if the LGU can have a copy of the result of the census and tagging.	It would be better to officially send a letter to DPWH to acquire a copy of the result of the survey.
Asked from the Barangays the official contact person for proper coordination and updates of the Project.	Barangay Focal Persons: Brgy. San Agustin – Secretary Eden Brgy. Tinajeros – Secretary Michelle Jimenez (09458444366) Brgy. Ibaba – Secretary Camille
Asked for permission from the barangays to conduct the census and tagging of the affected structures on the following week,	Barangay representatives approved the commencement of RAP surveys.

Issues and Concerns Raised	Response
since the data that will be gathered will be used for the SES activity.	
Requested an updated COVID-related information from the barangay to protect the technical staff from any transmission of virus as well.	Barangay will coordinate with the RAP Team the status of COVID-19 and the permission to conduct surveys.
Asked about relocation of the affected families.	The Project will look for a relocation site; if possible, an in-city, but if not, it will be off-city (either in Cavite or Bulacan), whichever is available.

The 2nd SCM of the identified PAFs along the TFs were conducted. During the 2nd SCM, PAPs were updated on the status of the Project. The major topics discussed during the 2nd SCM were (i) the ROW acquisition process, (ii) resettlement options, and (iii) livelihood restoration plan for affected businesses. A summary of the main concerns/issues raised during the 2nd SCMs is provided in Table 46.

Table 42. Summary of Issues and Concerns During 2nd SCM

Issues and Concerns Raised	Response
Affected House Structure	The affected structures are within the TF of the pumping station (only within the water body). Structures within this boundary will be removed in consideration that the adjacent structure can still stand. Owners of the affected lot/house will be properly compensated. If not the legal owner, the family will be relocated.
Relocation Site	Allocation of houses will be done by NHA. NHA relocation site is located in Brgy. Panghulo, Malabon City. Submission of MOA to NHA regarding the allocation of housing units will be done. Series of meetings with NHA will be requested for all the issues and concerns.
Relocation Process	DPWH will provide assistance like transportation, food for 14-day quarantine, and COVID-19 healthcare kit. The financial assistance will be provided to each family. According to NHA, the relocation may happen next year. The housing units are still under construction. Since there is no final date of relocation, the final schedule will depend on the NHA process. Prior to the relocation, electricity and water connection must be installed first.

Issues and Concerns Raised	Response
Objective of SCM	The objective of the SCM is to provide the results of the conducted SES. Also, this is the platform to raise issues and concerns regarding the Project. This is a Project under DPWH regarding the rehabilitation of pumping stations.
Inclusion of Property	The property is included in the TF and must be cleared by DPWH. Relocation of the family is needed. Bodies of water have no land title since these are government-owned.
Ongoing Construction of House Structures Within 2-meter Distance from the Existing House	Site validation with the LGU will be conducted to check the inclusion of the ongoing construction of structure.
Quarantine During Relocation	Inter-Agency Task Force for the Management of Emerging Infectious Diseases (IATF) guidelines will be followed regarding the number of quarantine days during relocation.
Identification of SHFC Members and Paid Contribution to SHFC	The initial masterlist will be submitted to the LGU and SHFC for the identification of members, if any. Series of meetings with SHFC will be coordinated to raise the issues and concerns of the families.
Provision of House and Lot by a Company	DPWH assistance will still be given.
Entitlements of Renter and Families Living in One House	All the DPWH financial assistance will be given, and that includes the livelihood programs. All families will be given the same assistance as the other families.
Implementation Schedule of the Project	The Project will not take 10 years to be completed. The Project is in the detailed engineering stage.
NHA Requirements	The NHA requirements will be discussed to the affected families.

The General Assembly was conducted last March 30, 2023 and was attended by 121 PAFs from different barangays. During the Assembly, PAPs were updated on the status and progress of the Project, relocation process, establishment of help desk, target relocation implementation, and the payment agreements and schedule. The major topics discussed during the Assembly were (i) TF clarifications, (ii) resettlement schedule, and (iii) NHA amortization schedule. A summary of the main concerns/issues raised during the Assembly is provided in Table 47.

Table 43. Summary of Issues and Concerns During General Assembly

Issues and Concerns Raised	Response
Relocation Schedule	Actual relocation is target to commence in May. However, RAP should be approved by the WB, LGU will validate the submitted documents, and NHA will require to conduct pre-qualifications. Hence, PAPs will be informed on the schedule of relocation.
Amortization Schedule	NHA already provided the payment scheme for 24 months as follows:

Issues and Concerns Raised	Response
	1st – Php 550.00 2nd – Php 500.00 3rd – Php 450.00 4th – Php 400.00 5th – Php 300.00 After 2 years of payment, selling price will be given to the PAPs and monthly amortization will range from Php 1,500 – Php 2,000 per month for 28 years.

11.5. Focus Group Discussion

During FGD, responses in SES were validated and insights regarding resettlement and livelihood rehabilitation were generated and incorporated in the preparation of LRIP and RAP. FGD participants for vulnerable groups were randomly selected from the list of vulnerable PAPs based on SES. The groups are composed of representatives from the vulnerable sectors, which include elderly, solo parents, households belonging to the below-poverty thresholds, lactating mothers, and PWDs. Business owners were also invited and joined the activity. Their issues and concerns were also gathered and considered in crafting the LRIP.

Table 44. Summary of FGD

Date	Sector	Participants	Number of Participants		
			Male	Female	Total
September 14, 2021	Vulnerable Sector	PAPs in Brgy. Ibaba	1	5	6
October 07, 2022	Vulnerable Sector	PAPs in Brgy. Tinajeros	2	8	10
October 08, 2022	Vulnerable and Business Owner Sectors	PAPs in Brgy. San Agustin	3	9	12

11.6. FGD with the Vulnerable Sector and Business Owners

Most of the members of vulnerable sector who participated in the FGD are single mothers and senior citizens. Majority of the attendees wish for a livable relocation site, where they can continue their in-city lifestyle.

Hereunder are the summary of issues and concerns raised:

Issues and Concerns Raised	Response
Availability of alternative livelihood in the relocation site (e.g., sari-sari store)	There will be an easy access to livelihood program to be implemented in the relocation site.
Accessibility of Relocation Site to Workplaces	Requested that the relocation site is near their work/job, and if it is possible, within

Issues and Concerns Raised	Response
	Malabon City, since most of them are working within the city and in adjacent cities (e.g., Novaliches, Quezon City). If the relocation site is outside the city, it will be hard for them to continue their work/job since daily commuting is difficult. Other option would be for them to rent a space near their workplace.
Effects of the Project in relation to job or business	One of the PAPs is working from home, requires a stable internet connection. Whenever this PAP will be relocated, there is a need to apply for internet connection, worsening their struggle for employment. One of the PAPs requested for financial assistance from the government to continue their sari-sari store business.
Programs that the government can provide to lessen the effect of the Project to their job or business	Livelihoods like sari-sari stores and food vending, which our senior citizens can easily manage to eventually support and sustain their financial needs, are some that can be provided.

XII. IMPLEMENTATION SCHEDULE

Table 45. Implementation Schedule

Action	Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4
Establish full time staff for the RAP Implementation Team	xxx							
Establish LGU HRTs/LIAC for sending and receiving LGUs	xxx							
Establish/Strengthen GRM; Establish and capacitate PCU	xxx							
Appoint/Deploy Community Contact Person	xxx							
MOA with KSA and LGU on relocation	xxx							
Completion of housing units with individual connection for electricity and water	xxx							

Completion of basic social infrastructure (schools, day care center, community police cost, and livelihood training center)		xxx						
Pre-relocation support: 1. Documentation of lot allocation and moving assistance 2. Transition allowance voucher issuance		xxx						
Preparation of entry pass to the relocation site		xxx						
Relocation: 1. Trucks as moving assistance for households' assets 2. Moving out AUVs for women and children, elderly, and the PWDs		xxx						
Cash disbursement for those availing of cash relocation assistance instead of house and lot. Cash assistance for immediate subsistence upon transfer.		xxx						
Food packs for 7 days, PPEs, sanitation kits, and emergency medicines for common sickness (colds, fever, and cough)		xxx						
Letter of endorsement from the school principal of the sending LGU to the receiving LGU for school admission of all school age children relocated by the Project.		xxx						
Moving notice and entry pass to the relocation site.		xxx						
Develop detailed employment and livelihood programs: • Implement immediate livelihood plan • Implement medium- and long-term livelihood plan	xxx	xxx	xxx	xxx				
Establish MOA and job placement arrangements with government and private companies	xxx	xxx						
Long livelihood plan implementation			xxx	xxx	xxx	xxx		
Monitoring and evaluation (Internal)			xxx	xxx	xxx	xxx	xxx	xxx
Monitoring and evaluation (External)			xxx	xxx		xxx		xxx

XIII. BUDGET REQUIREMENT

This RAP includes the detailed estimated cost of compensation, rehabilitation and other restoration/assistance entitlements of affected people/households, and administrative costs with breakdown. The cost estimates shall make adequate provision for contingencies. The estimated cost will be included in the total project cost, which may decrease or increase during the implementation of the RAP. The DPWH as the implementing agency/proponent will make sure that funds will be made available as soon as there is notice for the budget release.

Furthermore, this RAP will streamline the process of compensation by making the different types of payment at one time and effecting the full compensation, rather than paying installments which delay the ability of an affected person to restore their livelihood and incurs costs to the project in terms of interest.

Funds for the implementation of the RAP is at **One Hundred Thirty-Nine Million Twenty Thousand Five Hundred Nineteen and 70/100 Pesos (Php 139,020,519.70)** only, including 10% Project Administration Cost and 15% Contingency. The particulars of the RAP Cost are shown in Table 50.

Table 46. RAP Budget

Particulars	Total PAFs	Unit Cost (Php)	Total Cost (Php)	Equivalent in USD (USD 1 = Php 55.00)
Transfer assistance for trucking, vehicle for PAFs, and manpower assistance for vulnerable persons	106	10,000.00	1,060,000.00	19,272.73
Food allowance at Php 500.00 per PAF per day for 7 days	106	3,500.00	371,000.00	6,745.45
Livelihood assistance for skills training for employment and micro-enterprises, starter kits, and securing clearances and permits for employment and micro-enterprises	106	15,000.00	1,590,000.00	28,909.09
Electrical and water connection fees for PAFs	106	1,000.00	106,000.00	1,927.27
Processing of documents, e.g., notary, PSA, National Bureau of Investigation (NBI)/Police Clearance	106	3,000.00	318,000.00	5,781.82
CLRDP and social services structures and start-up capital for income generating activities for PAFs at Php 15,000,000.00 per site	1	15,000,000.00	15,000,000.00	272,727.27
Internal Monitoring	1	2,000,000.00	2,000,000.00	36,363.64
External Monitoring and Evaluation	1	3,000,000.00	3,000,000.00	54,545.45
Subtotal			23,445,000.00	426,272.72

Project Administration, Inter-Agency Coordination (10%)			2,344,500.00	42,627.27
Subtotal			25,789,500.00	468,900.00
Contingency (15%)			3,516,750.00	63,940.91
Grand Total			29,306,250.00	532,840.90
Resettlement Cost under MOA with NHA				
Four 5-storey and one 3-storey low-rise building	106	1,035,040.28	109,714,269.70	1,994,804.90
Overall Cost			**139,020,519.70**	**2,527,645.81**

13.1. Procedures for Flow of Funds

The UPMO-FCMC of DPWH is responsible for providing the needed funds for the implementation of the RAP. DO 119 s. 2017 stipulates the creation of UPMO-ROW Task Force that will manage the acquisition of ROW, and processing and payment of claims. Payment of ROW claims shall also be made by the DPWH Central Office in accordance with the said DO. The resettlement housing units will be paid by the qualified beneficiaries. Funds for social services and livelihood at the relocation site will be provided by DPWH and will be downloaded to LGU and the beneficiaries.

13.2. Funds to be Downloaded to LGU

A MOA will be prepared between the IA and the concerned LGU for the downloading of funds, specifically the budget for CLRDP amounting to Php 15,000,000.00 for each LGU.

13.3. Funds as Financial Assistance for PAFs

A MOA between the IA and the Land Bank of the Philippines (LBP) for the disbursement of financial assistance to each PAF will be prepared, in which the financial assistance will be given directly to them through their LBP personal accounts.

XIV. ANNEXES

The Annexes are on the next pages.
